

Questions and Answers from the Institutional Readiness Web Conference on 02/21/2007

Q: How will we be informed about training opportunities?

A: When we have training events scheduled we will inform the institutions via the weekly updates and through announcements sent to the Campus Coordinators, Technical Representatives and the Training Representatives for each campus.

Q: Can an agenda for the IR Web Conference be published before the next meeting?

A: Yes, for the March IR Web Conference we will post the agenda to the web site so that it will be available before the meeting.

Q: How long do you anticipate that it will take OIIT to complete the DBI's from each of the participating institutions?

A: That is a good question and the answer is complicated. At this point the deadlines have not past and we are still receiving tickets related to data cleanup. Once each deadline passes we will analyze the types of data issues that need cleaned up and begin to formulate appropriate solutions. These may include functional solutions as well as Data Base Interventions (DBIs). It is still to early in the process to make any accurate determination as to how long all of this will take.

Q: Will there be training for the Technical Reps?

A: Yes, there will be training for the Technical Reps. The first opportunity will be at the next Quarterly Update Meeting in April. We plan to have a break out session for the Technical Reps to specifically address technical issues related to the project.

Q: What do we do if we do not have any data cleanup items to submit?

A: We would like each Campus Coordinator to track the completion of the data cleanup tasks for their institution. We will be tracking the submission of data cleanup tickets. If you do not receive any from your institution we will contact the Campus Coordinator to confirm that the data cleanup tasks have been completed.
