Modifications to Existing Processes

Create ADP Benefit Acctg Entry

BOR Menu > BOR Payroll > Benefits Reconciliation > Benefit Accounting > Benefit Processes

The Create Benefit Acctg Entry process has been renamed Create ADP Benefit Acctg Entry to distinguish between the Aon and ADP processes.

Users will continue to run the Create ADP Benefit Acctg Entry process when they have ADP files to process. The new Create Benefit Acctg Entry process will be used to process the July benefits reconciliation data from Aight(Aon).

ADP will continue sending benefit reconciliation files for those institutions who have late COBRA enrollees and for retiree/COBRA payments received until September 15, 2017.

Create Benefit Acctg Entries

BOR Menu > BOR Payroll > Benefits Reconciliation > Benefit Accounting > Benefit Processes

OneUSG has created a new process called Create Benefit Acctg Entries that will integrate data from Aon/Aight into PeopleSoft Financials. This process will transfer both accounting entries and stage data to pers_serv_bor and hr_acctg_line tables for journal generation.

The process will run similarly to the ADP process; however, users will no longer have to correct and load mapping errors.

	<p><u>All ADP and OneUSG institutions should begin using this process with the receipt of the July 2017 benefits reconciliation files.</u></p> <p>Note: The processing parameters page must be saved before year and month fields will populate.</p>
