

## **PeopleSoft HRMS Release 3.17b Complete**

The purpose of this e-mail is to announce the completion of PeopleSoft HRMS Release 3.17b, which only includes implementation of the security banner that will be visible on the log in page.

Security guidelines specify that login banners should be used on networks, computers, and applications that are accessible through networks. The Security Advisory Group (subcommittee of the ACIT) recommended that this banner be implemented as soon as possible. Because of the nature of the modification, it is implemented in an interim release instead of in the next scheduled GeorgiaFirst Project Release.

Please note: during this release process, all server side cache files were deleted; this may cause performance issues during initial page loads.
