The purpose of this e-mail is to announce the completion of PeopleSoft HRMS Release 3.22a, which includes the modifications to the Badge Upload Process (BORI037) and the Check Print process (PAY003).

Badge Upload Process (BORI037): This process was modified to allow badge data to be loaded to the PS_BADGE_TBL without populating the Short Comment field in the badge file. Prior to the modifications, if the Short Comment field in the badge file was blank, the badge data would not be loaded.

Pay Check Print program (PAY003): This process was modified to resolve issues with the escape code sequence used at one of our GaFIRST institutions.
