The purpose of this e-mail is to announce the completion of PeopleSoft HRMS Release 3.30a, which includes the modifications to the Employee Count by Paygroup report (BORR074) to resolve the issues of 1) counting the same employee more than once if an employee is moved to and get paid from another locations within the same month period; and 2) printing the employee counts under a different location if there is only one paygroup paid from that location in that month.

Note: These modifications do not affect those institutions who have only one location.
