The purpose of this e-mail is to announce the completion of PeopleSoft HRMS Release 3.31a, which includes the modifications to the Populate TRS/ORP Temp Table process (BORIF04A) to resolve Known Issue KI0094 - Maymester Payrolls containing SUM Earn Codes. Prior to the modification, when the Populate TRS/ORP Temp Table (BORIF04A) process was run, employees that followed an employee containing SUM earnings for May, were incorrectly populated with the SUM earnings values from the previous row until a change in Plan or Earnings type occurred.

Institutions that have run the Populate TRS/ORP Temp Table (BORIF04A) process prior to Release 3.31a should rerun the process to ensure accurate results. It is recommended that the reconciliation of the TRS/ORP Report be performed prior to creating the TRS/ORP File for submission to TRS.
