High School Graduation Test Updates

Introduction

Description

Effective Fall 2010, students graduating from a Georgia Public High School on or after May 2010 will be expected to present scores on the five Georgia High School Graduation Tests. These tests include English Language Arts, Mathematics, Social Science, Science and Writing.

Currently, the English Language Arts test score is the only score validated for exempting a learning support requirement. This test score can exempt Learning Support English and Learning Support Reading.

Purpose

In order to track High School Graduation Test scores, OIIT has provided a list of test score codes to be used to establish the test scores, create the requirements and satisfy those requirements based on the scores the student received.

Purpose and Scope of Document

This document explains how to implement the ELA test scores and includes the following topics:

- Setting Up High School Graduation Tests
- Using High School Graduation Test Updates

Support

For additional OIIT resources and support, contact the OIIT Helpdesk:

- Web support request self-service:

Setting Up Georgia High School Graduation Test Scores

1. Create test codes (STVTESC)

Create these codes in the Test Code Validation form (STVTESC).

Code	Description
HELA	GAHS – English Language Arts
HMAT	GAHS – Mathematics
HSSC	GAHS – Social Science
HSCI	GAHS – Science
HSWT	GAHS – Writing

The minimum test score will be 100 while the test score maximum will be 999 for the English Language Arts, Mathematics, Social Science, and Science Georgia High School Graduation tests. The Writing test has a minimum score of 100 and a maximum score of 350.

3. Create requirements (ZORCPER)

Learning support requirements and holds are created when the CPE Results Update process (ZORCPER) is executed. The report output will display the requirements created by student.

Parameters for ZORCPER

No	Name	Required	Description/Instructions	Default Values
01	Test Activity Date	Yes	Enter the date that will be used to select the test data.	
02	System Status Code	Yes	Enter the requirement status code to be assigned to the learning support requirements that are created under University System policy.	
03	Institutional Status Code	Yes	Enter the requirement status code to be assigned to the learning support requirements that are created under institutional policy	
04	End or Remove CPE/CPC Hold?	Yes	Valid values are E and R. (E)nd hold updates the 'Hold Ending Date with the date the hold should expire. (R)emove hold deletes the record from the database.	
05	Hold End Date	Yes	Enter the date on which the hold will end. This parameter is only required if Parameter 04 is set to 'E'.	sysdate
06	Create LS Holds?	Yes	Valid values are Y and N. Y will create the learning support hold. N will not create learning support holds.	
07	Selection Identifier	No	Enter the code that specifies the desired sub-population.	
08	Application Code	No	Enter the code that identifies the general area for which the selection identifier is defined. This parameter is required if Parameter 07 is entered.	
09	Creator ID	No	When Parameter 07 is selected, enter the ID of the person who created the sub-population rules.	
10	User ID	No	Enter the user ID of the person who created the sub-population rules.	
11	Term	Yes	Enter the term code for which all students enrolled that term will be processed. When a population selection is used, this is the term to be used in the heading of the report.	

12	Run Mode	Yes	Valid values are A and U. (A)udit mode prints a report without actually updating the database. (U)pdate mode updates the database.	A

4. Create a population selection

On the Population Selection Definition Rules Form (GLRSLCT), create a compiled population selection using the following criteria.

Definition

Select: SHRNCRS_PIDM

From: SHRNCRS, STVNCST

Rules Data Element	Operator	Value	AND/OR
SHRNCRS_NCRQ_CODE	=	&NCRQCode	AND
SHRNCRS_NCST_CODE	=	STVNCST_CODE	AND
STVNCST_SATISFIED_IND	=	'Y'	AND

	SHRNCRS_NCST_CODE	=	STVNCST_CODE		AND
	STVNCST_SATISFIED_IND	=	'Y'		AND

Run the Population Selection Extract process (GLBDATA) for the population selection. The process should prompt for the entry of the HELA NCRQ code as a parameter.

5. Update the Learning Support Requirement (ZORGARU)

Run the Georgia Requirement Update process (ZORGARU) for the population selection. This will update the student’s Learning Support English and Learning Support Reading requirement to indicate exempt due to satisfying the HELA requirement.

For the “Requirement Type to Update” parameter, enter the requirement type associated with the LSUE and/or LSUR requirement. This type code can be found in the Requirement Type field on the ZOAGARQ for the LSUE and/or LSUR code. Run ZORGARU once for each requirement type code using the same population selection.

For the “Status Code” parameter, enter the code that should be used to satisfy/exempt the LSUE and/or LSUR requirement. All records updated by the process will receive this status code.
