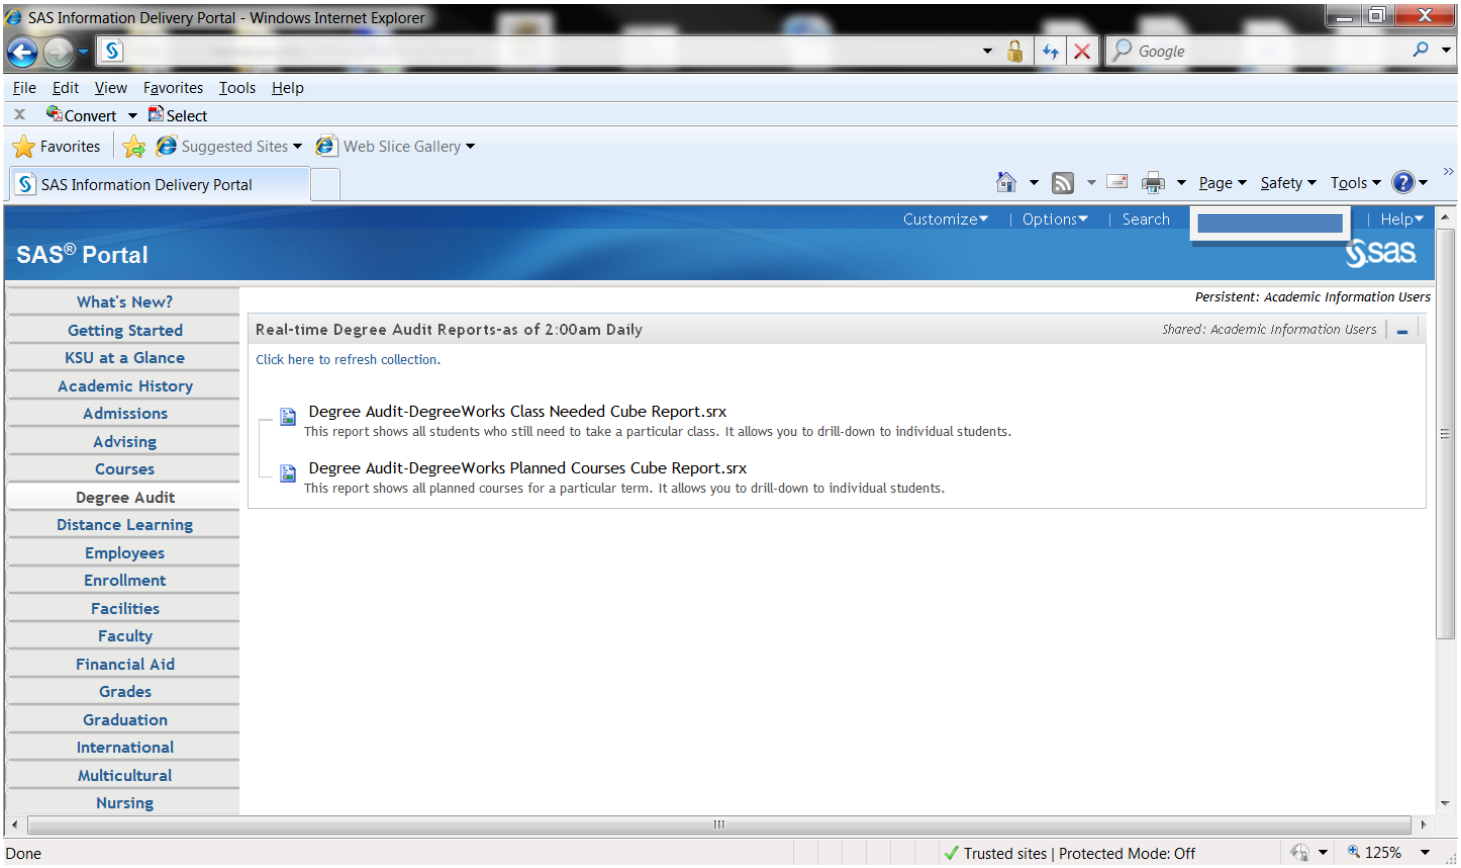
Kennesaw State University

Enterprise Information Management

Degree Audit



KSU allows access to the DegreeWorks reports via its SAS-powered Enterprise Reports Portal. KSU opted to breakout reporting of classes needed from the classes students planned to take in order to avoid any confusion. In addition, not all academic departments are using the planner for their students.

Reporting View – Planned Courses

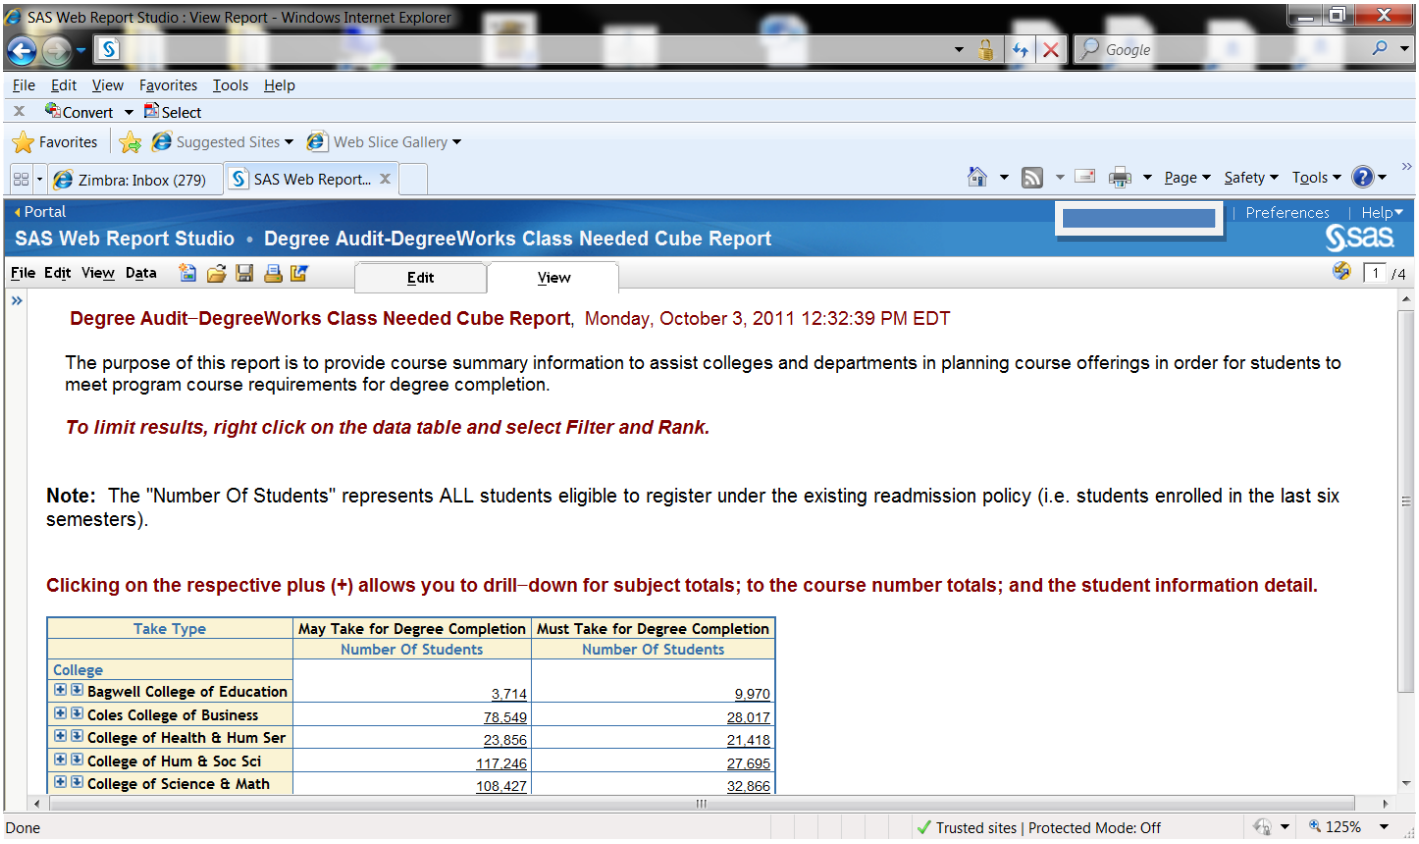
Reporting of the DegreeWorks data lends itself nicely to utilizing OLAP (On-Line Analytic Processing) technologies. As a result, KSU present the class planner data using OLAP technologies by the term in which the student plans to take a course, effectively allowing for a drill-down into the course acronym (i.e., discipline) and course number. The three screen captures above illustrate that drill-down process. By clicking on the number, KSU's SAS-powered reports allow for drill-through to a listing of the actual students that can be easily exported to Microsoft Excel or CSV formats. The student listing contains a number of fields for contacting the student, such as street address, e-mail address, etc.

Reporting View – Classes Needed by College and Department



Degree Audit–DegreeWorks Class Needed Cube Report, Monday, October 3, 2011 12:32:39 PM EDT

The purpose of this report is to provide course summary information to assist colleges and departments in planning course offerings in order for students to meet program course requirements for degree completion.

To limit results, right click on the data table and select Filter and Rank.

Note: The "Number Of Students" represents ALL students eligible to register under the existing readmission policy (i.e. students enrolled in the last six semesters).

Clicking on the respective plus (+) allows you to drill–down for subject totals; to the course number totals; and the student information detail.

KSU presents several reporting views of the DegreeWorks classes needed data. In the screen captures above, one view shows the college, department, course acronym, and course, number for the classes that students must or may take. This allows for drill-through to a discipline specific view of courses that students will need (or may need) in the future.

The reporting view in the screen captures above show a complete listing of all course acronyms and course numbers for courses DegreeWorks has determined may or must be taken by the student. Each course number allows for further drill-down to the students classification level, which can be useful in developing a schedule around how students are progressing through the curriculum.
