FAQ#:1-2HJBK4

Question: Occasionally, we see Location Management Room and Meal charges from SLARASG and SLAMASG appearing a student's account with a Web Self-Service User ID, for example: WWW_USER, WWW2_USER. How does this occur?

Answer:This occurs when a student accesses the the "Account Detail for Term" page on the Student Self-Service Product, under the following conditions...

a) For the Term, SLATERM has On-Line Assessments = Y
b) The student has an unassessed Room, Meal or Phone Assignment on SLARASG, SLAMASG and.or SLAPASG.

The "Account Detail for Term" page acts similiar to the on-line TSASPAY Student Payment Form. It will assess Location Management charges as well as Registration Fee Assessment charges when SLATERM and/or SOATERM allow on-line assessments and the charges were previously unassessed.

The following is from the Student Self-Service User Guide, page 9-7:
Account Detail for Term (bwskoacc.P_ViewAcctTerm)
When assessments are enabled on the Term Control Form (SOATERM) and the
Housing Term Control Form (SLATERM), and a student who has not been assessed
or has charges pending accesses the page (ie. Account Detail for Term page),
then fee assessment will run automatically. This applies to tuition and fees, as well as housing (including room, meals, and phone). Other information can also be displayed, such as memoed and authorized financial aid, other Accounts Receivable memos (contracts, exemptions, deposits), and installments as enabled via the Accounts Receivable Term Control Form (TSATERM). New assessments and installment plan assignments are saved to the database, but calculated memo transactions are not retained.
