SELECTING THE APPROPRIATE PROJECT DELIVERY OPTION
BOR FACILITIES OFFICERS CONFERENCE
OCTOBER 27, 2011

BASED ON THE STATE OF GEORGIA CONSTRUCTION MANUAL

Gifton St. E. Passley
October 27, 2011
INTRODUCTION

- THE PURPOSE OF THIS PRESENTATION IS TO ESTABLISH A FRAMEWORK FOR UNDERSTANDING AND SELECTING THE APPROPRIATE PROJECT DELIVERY OPTION.
- START BY LOOKING AT THE DEFINITION AND STRUCTURE OF EACH DELIVERY OPTION
- LOOK AT THE COMPARISON OF EACH DELIVERY OPTION
- LOOK AT THE DELIVERY OPTION SELECTION CRITERIA AND PROCESSES
- LOOK AT THE ASSOCIATED DESIGN CONTRACTS
- LOOK AT SOME COMMON MISTAKES TO AVOID
- CONCLUDE WITH QUESTIONS AND ANSWERS
DEFINITION AND STRUCTURE OF EACH DELIVERY OPTION
STATE OF GEORGIA PRIMARY DELIVERY METHODS

- DESIGN-BID-BUILD (DBB)
- CONSTRUCTION MANAGEMENT (CM/GC)
- DESIGN-BUILD (DB)

ASSOCIATED DESIGN CONTRACTS
- DESIGN PROFESSIONAL (DBB)
- DESIGN PROFESSIONAL (CM/GC)
# CONSTRUCTION DELIVERY OPTIONS AND CORRESPONDING SELECTION METHOD

<table>
<thead>
<tr>
<th>Project Delivery Method</th>
<th>Solicitation Method</th>
<th>Construction Professional</th>
<th>Design Professional</th>
</tr>
</thead>
<tbody>
<tr>
<td>Design-Bid-Build (DBB)</td>
<td>ITB</td>
<td>or</td>
<td>QBS</td>

<td>QBS</td>
<td>QBS</td>
<td></td>
</tr>
<tr>
<td>Design-Build (D/B)</td>
<td>QBS</td>
<td>(one combined Design/Build contract)</td>
<td></td>
</tr>
</tbody>
</table>

ITB = Invitation to Bid | Competitive Sealed Bids  
QBS = Qualification Based Selection | Non-priced Proposals  
BVS = Best Value Selection | Competitive Sealed Cost Proposal
DESIGN-BID-BUILD DELIVERY METHOD DEFINED

- Is the traditional delivery method for construction projects Owner engages a Designer to prepare the design for the complete facility including construction drawings, Specification and contract packages
- Contractor pursues a low-initial cost approach to completing the project
DESIGN-BID-BUILD DELIVERY METHOD DEVELOPMENT
DESIGN-BID-BUILD RELATION OF KEY STAKEHOLDERS

There are three prime stakeholders:
- The Owner
- The Design Professional
- The Construction Professional

There are two primary contracts:
- Owner/Design Professional
- Owner/Construction Professional

- Tenant
- Using Agency
- Program Administrator (Optional)
- Owner
- Design Professional (Architect/Engineer)
- Construction Professional (General Contractor)

* If GSFIC is contractual Owner

<table>

</tr>
</tbody>
</table>
DESIGN-BID-BUILD MANAGEMENT TEAM
The Design Professional completes a set of Construction Documents based on the Owner’s program of requirements. The completed Construction Documents are used for construction bidding. A Construction Professional is selected based on the lowest responsible and responsive bid proposal. The Owner contracts for construction with the successful Construction Professional and the project is built.
CONSTRUCTION MANAGEMENT (CM/GC) DELIVERY METHOD DEFINED

- Owner engages a CM/GC who provide professional management assistance to the Owner prior to construction, and advice on constructability, budget and schedule considerations
- During construction the CM later converts to the equivalent of a General Contractor
- The CM holds the risk of subletting the construction work to trade subcontractors and guaranteeing completion of the project for a fixed, negotiated price following completion of design
CONSTRUCTION MANAGEMENT
(DELIVERY METHOD DEVELOPMENT)
CM/GC-RELATION OF KEY STAKEHOLDERS

CONSTRUCTION MANAGEMENT (CM): RELATION OF KEY STAKEHOLDERS

There are three prime stakeholders:
- The Owner
- The Design Professional (Architect/Engineer)
- The Construction Manager/General Contractor (CM/GC)

There are two primary contracts:
- Owner/Design Professional
- Owner/Construction Manager/General Contractor (CM/GC)
CM/GC MANAGEMENT TEAM
The Design Professional initiates the design based upon the Owner’s program of requirements. During Design, the CM/GC is selected and placed under contract for preconstruction services to consult with the Design Team on project cost, project schedule, constructability, and quality control reviews. The Owner also contracts with the CM/GC who then contracts with various trade contractors for construction of the project.
A contracting format is an arrangement for the distribution of construction risk – most frequently cost or performance risk—between the parties to a contract.

Performance risk shifts are accomplished by the writing of end-product or performance contracts. When applied to a complete project these are typically known as Design-Build Contracts.
DESIGN-BUILD DELIVERY METHOD DEVELOPMENT
DESIGN-BUILD DELIVERY SYSTEM DEFINED

- Gaining in popularity because it allows the Owner to utilize a single contract to acquire the services of both Designer and Contractor to construct a facility

- Often an association between a general contractor and a designer, although the Construction Professional usually leads the team
DESIGN BUILD DELIVERY SYSTEM DEFINED

- Design-Build is responsible for all coordination between design and construction
DESIGN –BUILD RELATION OF KEY STAKEHOLDERS

There are three prime stakeholders:
- The Owner
- The Executive Administrator
- The Design Builder

There is only one primary contract:
- Owner/Design Builder
The Owner determines directly, or through consultants, the project’s program of requirements and criteria that sufficiently describe the project. This program of requirements and criteria are delivered to the Design-Build firm to serve as the basis of the design for the project until the GMP Component Change Order is accepted. The GMP and the accompanying Construction Documents become the project definition when the GMP is accepted. The Design-Builder is responsible for adequacy, accuracy, and completeness of design and subsequent delivery of the entire project.
COMPARISON OF EACH DELIVERY OPTION
COMPARISON – DB versus DBB

- **Similarities**
  - Pre-construction phase
  - Completion phase

- **Differences**
  - Design Professional works for DB
  - All work competitively bid and performed by Trade Contractors and Suppliers
  - Design-Builder is paid cost plus a fee
  - Executive Administrator responsible for Owner’s Quality Control (Optional)
  - Special conditions required for DB to self perform work
COMPARISON – DB versus CM/GC

- **Similarities**
  - Pre-construction phase
  - Construction administration after GMP
  - Completion Phase

- **Differences**
  - Single contract vs. multiple contracts
COMPARISON – DBB versus CM/GC

- **Similarities**
  - Pre-construction phase
  - Construction administration after GMP/Competitive Bid
  - Completion Phase

- **Differences**
  - All work competitively bid and performed by Trade Contractors and Suppliers
  - Lump sum fee versus cost plus a fee
  - Special conditions required for CM/GC to self perform work
INTRODUCTION

- HAVING ESTABLISHED THE DELIVERY METHOD VOCABULARY THE NEXT STEP IS TO DETERMINE WHICH OF THE OPTIONS IS MOST APPROPRIATE FOR A PARTICULAR PROJECT.

- A REVIEW OF PERTINENT LAWS, RULES REGULATIONS AND POLICIES EARLY IN THE LIFE OF A PROJECT IS ALSO STRONGLY RECOMMENDED IN ORDER TO ALLOW TIME TO OBTAIN APPROVAL FOR USE OF AN ALTERNATIVE PROJECT DELIVERY METHOD.

- YOUR TRUSTED COUNCIL/ADVISORS SHOULD BE ABLE TO ADMIT THEIR PREJUDICES BASED ON THEIR EXPERIENCE AND SET THEM ASIDE TO HELP YOU EVALUATE WHICH DELIVERY OPTION IS IN THE BEST INTEREST OF YOUR PARTICULAR PROJECT. THEY SHOULD BE ABLE TO ANSWER THE QUESTION, WHY ARE YOU RECOMMENDING THIS PARTICULAR DELIVERY OPTION.

## ESTABLISHING DETERMINING FACTORS

<table>
<thead>
<tr>
<th>NEED FACTORS</th>
<th>SUCCESS FACTORS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Schedule/ Necessity to Overlap Phases</td>
<td>Owner's Internal Resources &amp; Philosophy</td>
</tr>
<tr>
<td>Ability to Define the Project Scope/Potential for Changes</td>
<td>Ability or desire to Define and Verify Program &amp; Design Content/Quality</td>
</tr>
<tr>
<td>Tight Project Milestones or Deadlines</td>
<td>Experience with the Particular Delivery Method &amp; Forms of Contract</td>
</tr>
<tr>
<td>Amount of Overlap of Design &amp; Construction Phases</td>
<td>Need/Desire for the Contractor's Input During Design</td>
</tr>
<tr>
<td></td>
<td>Potential for Changes During Construction</td>
</tr>
<tr>
<td></td>
<td>Scope Definition</td>
</tr>
</tbody>
</table>

These are certainly not all that need to be considered but addressing these Primary Factors will guide the selection of the most appropriate delivery option. Additionally, addressing these early in the project cycle will increase the chances for a successful project.
FACTORS THAT AFFECT CHOICE OF DELIVERY OPTION

- Impacts the project team composition
- Impacts the project budget
- Impacts the project schedule
- Impacts the project management plan
- Impacts the project risk assignment

As a result of these and other potential impacts, it is critical that the appropriate project delivery option is chosen.
WHICH IS THE BEST OPTION

- WHILE NO ONE PROJECT DELIVERY METHOD IS PERFECT FOR ALL APPLICATIONS, ONE OPTION MAY BE BETTER SUITED THAN ANOTHER BASED ON UNIQUE REQUIREMENTS FOR AN AGENCY’S PARTICULAR PROJECT.

- THE REQUIREMENTS FOR EACH PROJECT SHOULD BE EVALUATED TO DETERMINE WHICH OF THE VARIOUS PROJECT DELIVERY OPTIONS WOULD MOST LIKELY PRODUCE THE BEST OUTCOME FOR THE STATE.
ADDRESSING THE FACTORS THAT AFFECT CHOICE OF DELIVERY OPTION

- **SCHEDULE NECESSITY TO OVERLAP PHASES**
  - **Primary factor:** is tight project milestones/deadlines.
  - **The critical question:** is whether there is an overlap of design and construction phases necessary to meet schedule requirements.
  - **The ramifications:** if the project requires a schedule that can only be maintained by overlapping of the design and construction phases, then one of the alternative delivery options should be chosen.

- **ABILITY TO DEFINE THE PROJECT SCOPE/POTENTIAL FOR CHANGES**
  - **Primary factor:** Is *Scope Definition*.
  - **The critical question:** Is the scope of work difficult to define.
  - **The ramifications:** if it would be difficult to produce a set of drawings and specifications that will fully describe the work in question, then one of the qualifications based selection options should be considered.
ADDRESSING THE FACTORS THAT AFFECT CHOICE OF DELIVERY OPTION

● OWNERS INTERNAL RESOURCES AND PHILOSOPHY
  – Primary factor: is the ability/desire to define/verify program/design content/quality.
  – The critical question: is will the Owner utilize outside resources (Executive Administrator) to verify quality.
  – The ramifications: if in house resources are not available, extra caution should be taken when using Design Build. If Design-Build is desired and in-house resources are not available, outside resources (Executive Administrator) should be engaged to assist in verifying that the quality desired by the Owner is incorporated.

● DESIRE FOR A SINGLE CONTRACT OR SEPARATE CONTRACTS
  – Primary factor: is the ability to eliminate responsibility for disputes between designer and builder.
  – The critical question: does the Owner desire to hold a single entity responsible for coordination collaboration and productivity for the entire project.
  – The ramifications: because of the integrated nature of the Design-Build Method, it allows the Owner to hold a single entity responsible for the project and keep disputes in-house with the Design Builder.
ADDRESSING THE FACTORS THAT AFFECT CHOICE OF DELIVERY OPTION

- **REGULATORY LEGAL AND/OR FUNDING CONSTRAINTS**
  - **Primary factor:** is the Regulatory and Statutory Requirements.
  - **The critical question:** is do laws, rules regulations, etc., permit the use of an alternative project delivery method.
  - **The ramifications:** are that the decision on what delivery option is most appropriate must be made early so that sufficient time is available for any justification that needs to be prepared to gain approval for an alternative delivery option if that option is most appropriate.

  - **Primary factor:** State Budget and Funding Cycles
  - **The critical question:** Is funding available for construction and initiation of design.
  - **The ramifications:** while any of the options will work with complete project funding any phasing of funding can have a major impact on the decision of which option to select. For example, without complete project funding, Design Build is not feasible.
**PROJECT DELIVERY APPROVAL FLOW CHART (GUIDE)**

**NEED FACTORS**

- **is overlap of design and construction phases necessary to meet schedule requirements?**
  - Yes
  - No

- **is the scope of work difficult to define; is this a unique project type?**
  - Yes
  - No

- **is there a significant potential for changes during the construction?**
  - Yes
  - No

- **is assistance of a constructor needed during the design for scope definition, schedule determination, constructability or cost control?**
  - Yes
  - No

- **Are your project execution requirements fully defined and understood?**
  - Yes
  - No

**SUCCESS FACTORS**

- **Does the Requestors regulations, policies, etc., permit the use of alternative delivery method?**
  - Yes
  - No

- **Is the Requestor's funding available for construction at the initiation of the design?**
  - Yes
  - No

- **Does the Requestor have in-house resources to verify quality in design/construction?**
  - Yes
  - No

- **Does the Requestor have in-house personnel experienced in alternative delivery options or have a plan to augment staff with experience outside personnel?**
  - Yes
  - No

- **Does the Requestor need to, and have the ability to participate in the selection of trade contractors and suppliers?**
  - Yes
  - No

- **Does the Requestor need to have complete access to all Constructor's information including capabilities and costs?**
  - Yes
  - No

- **Does the Requestor have in-house design resources qualified to oversee design professionals or will commit resources for design management?**
  - Yes
  - No

- **Does the Requestor have a single entity to be responsible for coordination, collaboration and productivity for the entire project?**
  - Yes
  - No

**NOTES**

- **Alt. Delivery Not Approved**
- **Only CM/GC should be considered**
- **Consider CM/GC over Design-Build**
- **Alt. Delivery Approval may require Adequate Plan**
- **Document the Need; Increased Scrutiny for QBS Option**
- **Consider Design-Build over CM/GC**

**Selection Based on Most Appropriate Delivery Option**
DESIGN PROFESSIONAL CONTRACT FOR DESIGN BID BUILD (DBB)

- Include legal terms and conditions that identify scope of work, roles, and responsibilities
- Specifically contains the Project’s Stated Cost Limitation (SCL)
- Contains fees, hourly rates, total number of calendar days to complete Construction Documents
DESIGN PROFESSIONAL CONTRACT
FOR DESIGN-BID-BUILD (DBB)

- Specifies total number of calendar days required to complete a Preliminary Design and Construction Schedule
- Specifies the total number of site visits included in fee
- Specifies multipliers for design and construction administration of change orders
DESIGN PHASE SERVICES

- Include all normal and customary professional services of the Design Professional and its Design team including the responsibility of a “Building Official”
- Design team consists of architectural, civil, structural, mechanical, plumbing, fire protection and other specialty consultants
- Confirm project scope is compatible with SCL
DBB - START-UP, BID, AWARD CONSTRUCTION AND CLOSEOUT

- Conduct prebid conference
- Issue addenda to answer questions
- Modify supplementary conditions
- Selection of contractor through competitive bid
- Performs basic office/field services
- Monitor contractor performance
- Evaluate work, issue notice of noncompliant work
- Certify payment, validate change orders
- Conduct material completion inspection and issue final punch list
- Issue certificate of material completion
- Provide deliverables
DESIGN PROFESSIONAL CONTRACT FOR CM/GC - PRECONSTRUCTION

- **CONCEPT DESIGN STUDIES:**
  - SITE PLAN, BUILDING PLAN, SECTIONS, ELEVATIONS AND NARRATIVES
  - INITIAL AND UPDATED STATEMENT OF PROBABLE CONSTRUCTION COST

- **SCHEMATIC DESIGN DOCUMENTS:**
  - DRAWINGS AND OUTLINE SPECIFICATIONS
  - MAJOR FF&E DRAWN TO SCALE
  - UPDATED DESIGN AND CONSTRUCTION SCHEDULE
  - STATEMENT OF PROBABLE CONSTRUCTION COST AND PLAN TO ADDRESS DIFFERENCES WITH THE SCL
  - RED-LINE COPY OF SITE PLAN INDICATING CONSTRUCTION STAGING AND TRAFFIC ROUTING
DESIGN PROFESSIONAL CONTRACT FOR CM/GC - PRECONSTRUCTION

- DESIGN DEVELOPMENT DOCUMENTS:
  - DRAWINGS AND OUTLINE SPECIFICATIONS TO FIX AND ILLUSTRATE THE SIZE AND CHARACTER OF ENTIRE PROJECT
  - INITIAL CODE COMPLIANCE REVIEW (PRELIMINARY FIRE MARSHALL REVIEW)
  - STATEMENT OF PROBABLE CONSTRUCTION COST
  - UPDATED DESIGN AND CONSTRUCTION SCHEDULE
  - REVIEW CCO/GMP
DESIGN PROFESSIONAL CONTRACT FOR CM/GC

- DURING CONSTRUCTION PHASE PERFORM SIMILAR SERVICES TO THOSE UNDER DBB
- DURING MATERIAL COMPLETION PHASE, PERFORM SIMILAR SERVICES TO THOSE UNDER DBB
- DURING FINAL COMPLETION PHASE, PERFORM SIMILAR SERVICES TO THOSE UNDER DBB
DESIGN PROFESSIONAL CONTRACT FOR DESIGN-BUILD

**DESIGN PHASE:**

- ALL NORMAL AND CUSTOMARY PROFESSIONAL SERVICES OF THE DESIGN PROFESSIONAL AND ITS CONSULTANTS REQUIRED IN CONNECTION WITH:
  - SCHEMATIC DESIGN
  - DESIGN DEVELOPMENT
  - CONSTRUCTION DOCUMENTS
CONSTRUCTION PHASE:
- RESPOND TO RFIs
- SHOP DRAWINGS REVIEW
- EVALUATION OF THE WORK
- ENSURE THAT DESIGN MEETS CODE
- INFORM OWNER/SHARE NOTICE OF UNACCEPTABLE WORK
AVOID COMMON MISTAKES -DBB

- Ensure adequate number of site visits are included in DP contract
- Ensure that roof and wall bond cost include all associated components
- Ensure unit price for fill and BMP are included in supplemental general conditions
- Ensure that certification requirements for subcontractors are verified
- Ensure that subcontractors are bonded depending on the value of their contract
- Ensure that delivery items are included in progress schedule/submittal
- Ensure that allowable weather days are specified/defined
- Ensure that retainage is not converted to 5% after one half of contract sum is completed
AVOID COMMON MISTAKES – CM/GC

- Ensure that construction contingency is not spent without prior approval by the PM and tracking system is followed.
- Ensure that CCO and GMP change orders are accepted/rejected within the time period specified by contract.
- Ensure that construction document change order is submitted and approved.
- Ensure that preconstruction phase cannot extend beyond the execution of the GMP change order.
- Ensure that retainage is not converted to 5% after one half of contract sum is completed.
AVOID COMMON MISTAKES - DB

- Ensure that you have an executed contract signed by the design builder, and other required/authorized parties.

- Ensure/verify that bonding and insurance are provided in accordance with contract.

- Ensure that design builder designate management leader (PM).

- Negotiate and establish all fees up-front.

- Ensure that notice of commencement is posted in accordance with Georgia law and stamped-recorded copy provided.
AVOID COMMON MISTAKES - DB

- Clarify false starts with respect to commissioning, special inspections, etc.

- Specify inclement weather delay requirement based on average weather condition in area

- Ensure that CCO and GMP change orders are accepted/rejected within the time period specified by contract
AVOID COMMON MISTAKES AT MATERIAL COMPLETION

- The work must be complete and **ready for immediate occupancy** with the exception of minor items (punch list) and permitted incomplete work.

- Minor items must be completed in 30 days and not interfere with occupancy of project.

- Design Professional must inspect and certify the facility for completeness and occupancy.
AVOID COMMON MISTAKES AT MATERIAL COMPLETION

- Inspections and certifications by regulatory agencies must be obtained.

- Using Agency must have been trained on operations of the building’s systems and executed documents for acceptance of the project.
CONCLUSION

- THE ENVIRONMENT IN WHICH A PROJECT IS INITIATED MAY NECESSITATE AN OWNER TO TAKE SPECIFIC, INTENTIONAL STEPS TOWARDS SETTING ITS COURSE IN ORDER TO ACHIEVE A SUCCESSFUL PROJECT. THOSE STEPS INCLUDE ASSESSING THE PROJECT DELIVERY OPTION MOST LIKELY TO RESULT IN A PROJECT THAT MEETS BUDGET, SCOPE, SCHEDULE AND QUALITY CONSTRAINTS.
QUESTIONS
