

Known Issue: KI9.2-005-MSS: Request to Adjust Leave Balances Appears to Change Employee Salary

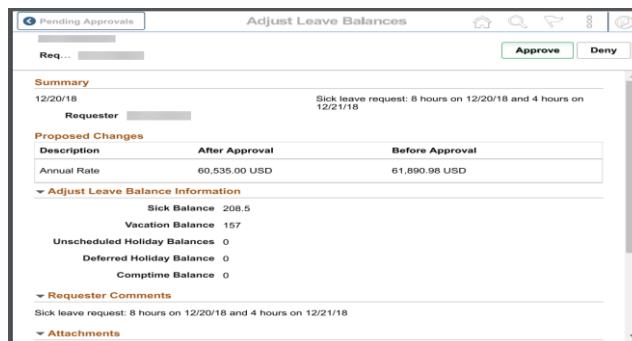

POSTED: January 24, 2019

STATUS: Active

Audience: HR Practitioners

Issue: MSS request to adjust leave balances APPEARS to change employee salary information for employees who received merit increases. For example, if a manager submits a request to adjust an employee's leave balances for December and that employee received a merit increase in January, the salary information for "after approval" will reflect the employee's December salary.

Because this transaction does not update any salary information, employee salaries remain correct according to their compensation information in Job Data.

Functional Workaround: Continue to approve/deny requests and explain to approvers the details noted above.

Tentative Resolution Information: A fix for this issue is under investigation.
