3.3.5 University System and Technical College System of Georgia Articulation Agreement
The articulation agreement is based on the principles of serving student needs, avoiding duplication of mission, using state resources efficiently, and expanding opportunities for postsecondary attainment in Georgia.

A Postsecondary Oversight Council comprised of appropriate System Office staff from the TCSG and USG will meet on a regular basis to assure compliance with this articulation agreement, address other articulation issues if they arise, and encourage the development of programs and policies to support Georgia’s college completion goals.

3.3.5.1 Associate Degrees, Diplomas, & Certificates
Associate degrees, diplomas, and certificates authorized to be awarded by public institutions in Georgia are defined as follows:

1. Associate of applied science (AAS) degrees are primarily for students who intend to enter specific career fields immediately upon graduation. These degrees are generally awarded through successful completion of a planned program of study at TCSG institutions. In order to minimize duplication of program offerings across the TCSG and USG, the following procedures will be followed for all new associate of applied science degrees.

1.1. All new associate of applied science degrees proposed for implementation at USG institutions after January 1, 2012 will be submitted through the following process:
   • The USG institution submits the degree proposal to the USG System Office. If the degree duplicates an existing AAS degree at a TCSG institution near the proposing USG institution, the proposed degree must have a letter of support signed by the respective TCSG college president.
• USG System Office staff will present the proposal to the TCSG System Office for review by System Office staff.
• If recommended by TCSG System Office staff, the proposal will be reviewed by the TCSG Board.
• The TCSG Board will return the proposal to USG with a recommendation for support or non-support.
• USG System Office staff will share the recommendation from the TCSG Board with the USG Board. The USG Board will take final action on the proposal.

2. Associate of arts (AA) and associate of science (AS) degrees are primarily for students who intend to transfer to another institution for completion of a four-year degree program. These degrees are generally awarded through successful completion of a planned program of study at USG institutions.

2.1. TCSG institutions will not offer associate of arts degrees.

2.2. All new associate of science degrees proposed for implementation at TCSG colleges, regardless of delivery system, after January 1, 2012 will be submitted through the following process:
• The TCSG institution submits the degree proposal to the TCSG System Office. The proposed degree must have an articulation agreement signed by the respective TCSG and USG institutions’ presidents.
• TCSG System Office staff will present the proposal to the USG System Office for review by System Office staff.
• If recommended by USG System Office staff, the proposal will be reviewed by the Board of Regents (BOR).
• The BOR will return the proposal to TCSG with a recommendation for support or non-support.
• TCSG System Office staff will share the recommendation from the BOR with the TCSG Board. The TCSG Board will take final action on the proposal.

3. Technical certificates and diplomas are generally awarded for the successful completion of a planned program of study through the colleges of TCSG. These programs are typically not designed for transfer.

4. Bachelor’s degrees are offered only through USG institutions.

3.3.5.2 General Education Course Transfer
This policy assures students who transfer between TCSG and USG institutions that they will not be required to repeat the course work approved for transfer that was successfully completed at another institution.

USG institutions and TCSG institutions will accept the following general education courses for transfer between their respective institutions. SECTION 3.
