Human Resources

Multiple Components of Pay (MCOP)

- During an audit of MCOP, we found that there are a number of employees who need data corrections in OneUSG
 - Pay Frequency current process is to use a monthly pay frequency, recently found that annual frequencies are causing downstream issues with Commitment Accounting
 - Annual Benefits Base Rate (ABBR) supplements added to the ABBR that should not be
- SSC will be reaching out to practitioners with any corrections that need to be made

Incorrect Service Dates

- •A DBI script was recently run to check all of the override boxes on the Employment Dates panel in Job Data
- •This was done to prevent the known Oracle issue from occurring, where dates are reset when using "correction mode" or "include history"
- •The USG Service Date and Benefits Service Date fields should match
- •SSC is running reports and working with institutions to get this data updated

Payroll

Known Issue KI9.2-017-PY

Some Rehired Employees Have New Tax Row

 When an employee is rehired within the same company and Tax Location, PeopleSoft is incorrectly creating a new default row with Federal Form W4 2020 or later version. These default withholding elements may be different than the employee's existing row.

Functional Workaround

- A query has been created to identify these instances.
 Practitioners should work with employees to have tax details updated. The query prompts on Company and Range of Dates
 - BOR_PY_SYS_CHG_FED_TAX_AUD

Tentative Resolution Information

- Oracle BUG fix is currently in testing

New Earnings Codes

- Earnings codes related to COVID-19 leave and teleworking have been created for Retro Pay Progressing

Ad Hoc Releases

• Summer Pay Full Delete

- Prior to the correction, when users zeroed out ALL
 Summer Pay Details, it did not remove Additional Pay
- Partial deletes worked as designed without issue
- After the correction, the zeroed out Summer Pay Details successfully removed all Additional Pay
- Even though there is a value in the Summer Pay (Amt Per Summer) field, this will not impact employee pay
- Fix applied Thursday, 5/7/2020
- ITS ran a query to identify an potentially impacted employees for manual data correction and worked with practitioner(s) to resolve

Ad Hoc Releases

- Summer Pay Full Delete
 - Example: Dr. Biology is no longer teaching in May, June or July
 - Dr. Biology's manager leaves the Summer Pay (Amt Per Summer) at \$12,000 but updates the Summer Pay Details:

Summer Pay: \$	12,000.00	(Amt Per Summer)		Calendar Year:	2020		Previous Year

I _{Earning} Summer Pay	Percent	Combination Code 18100010001001	Edit ChartFields	May \$0.00	June \$0.00	July \$0.00	August + -

 Since Summer Pay (Amt Per Summer) is a required field you cannot zero out this amount and successfully save the page.

Commitment Accounting

Reminder: Known Issue-Encumbrance Calculation

- **ITEM 1: MCOP Earning Encumbrances** (New Known Issue)
 - ISSUE A: Positions set up for MCOP with a future end date are encumbering the total salary instead of the pay rate set up in the Compensation panel on the Job page for each component of pay for each pay period. This effectively doubles the salary encumbrance for these positions.
 - ISSUE B: Positions set up for MCOP with an end date are continuing to encumber all components of pay past the end date on Job if these components of pay are included in the active department budget table row.

28

Reminder: Known Issue-Encumbrance Calculation

• Item 2: MCOP Fringe Encumbrances

- ISSUE: With Release 5.20, OneUSG updated the encumbrance process to distribute encumbrances for multiple components of pay (MCOP) earnings based on funding setup in the Department Budget Table. During regression testing, a defect was found with the fringe distribution steps producing incorrect results.
 - As a temporary workaround, fringe distributions to MCOP earnings codes were suppressed in this release. The total fringe amount is accurate based on REG and MCOP earnings, but is only distributed between default (blank) distribution lines from the Department Budget Table at this time. MCOP earnings encumbrances are distributing accurately based on setup in the Department Budget Table.

Reminder: Known Issue-Encumbrance Calculation

- Item 3: Return from Short Work Break Effective June 1, 2020
 - ISSUE: The calculation for fringes is based on the employee's most recent check. Any positions with an RWB (Return from Work Break) action on June 1, 2020 will encumber fringes (health, life, retirement, and taxes) for June even if the compensation rate is \$0.

• Item 4: Taxes for H Paygroup for June 30, 2020

 - **ISSUE**: The encumbrance calculation is not correctly prorating the last pay period of the year for H paygroup encumbrances. The calculation is recording a full pay period's tax encumbrance instead of a reduced amount for this paygroup.
