

Psychology

Field of Study (formerly Area F) Learning Outcomes

Upon completion of Field of Study Requirements (formerly Area F), students will be able to:

1. Identify basic concepts and research findings in psychology
 - 1a. Define and explain basic psychological concepts
 - 1b. Interpret research findings related to psychological concepts
 - 1c. Apply psychological principles to personal growth and other aspects of everyday life
2. Solve problems using psychological methods
 - 2a. Describe the advantages and limitations of research strategies
 - 2b. Evaluate psychological research
 - 2c. Draw logical and objective conclusions about behavior and mental processes from empirical evidence
 - 2d. Examine how psychological science can be used to counter unsubstantiated statements, opinions, or beliefs
3. Critically evaluate information from guided elective courses so that they may gain a greater comprehension of behavior and mental processes

Field of Study (formerly Area F) Course Guidelines

Area F consists of 18 hours of lower-division courses related to the Psychology and courses which are prerequisite to higher level major courses in Psychology:
