
Announcement

TO: GeorgiaFIRST PeopleSoft Financials Users

POSTED: September 29, 2016

SUBJECT: Asset Management Module Enhancement Review Session

One of the benefits of the PeopleSoft Financials 9.2 upgrade and Oracle's continuous release delivery methodology is gaining the availability of new features and functionality without having to do a major application upgrade. The GeorgiaFIRST Financials support team is reviewing the functionality and enhancement options that have not yet been made available within each module.

To ensure that our Operational Roadmap is aligned with the priorities of the institutions we support, we are hosting a series of Module Enhancement Review Sessions. These sessions should be attended by institutional module experts and decision makers.

The focus of these sessions will be to:

- Review 9.2 configuration or functionality available, but not yet implemented
- Review upcoming configuration or functionality that will become available with the next Annual Oracle Maintenance Release
- Measure institutional interest
- Prioritize desired functionality

The results and deliverables from these sessions will allow us to develop a Module Roadmap and implementation plan.

The next Module Enhancement Review Session is currently being planned as follows:

Module(s): Asset Management

Date: November 1, 2016

Location: WebEx

Time: 9:00 am to 12:00 pm

We encourage all institutions to have representation at this session so that interest in and prioritization of functionality discussed can be accurately measured.
