Known Issue: KI9.2-130_BP– JED Import Issues

POSTED: April 2, 2020

STATUS: Active

NAVIGATION: Navigator > BOR Menus > BOR Budget Prep > Budget Prep Processing > HCM Import

ISSUE: Occasionally after users run the HCM Import into Budget Prep, a discrepancy exists between the effective date imported from OneUSG for Job Earns Dist (JED) rows and the effective date imported from OneUSG Job data. Meaning, imported rows that should exclude JED data sometimes import JED data from an earlier effective dated row.

For Example, a position with a 6/1/20 job row removing JED rows associated with MCOP earnings may still import the older, 2/1/20 effective dated JED row. Combined with the issue from KI9.2-129_BP, this means rows that should not need blank Dist Pct fields corrected may need manual correction.

FUNCTIONAL WORKAROUND: There is no functional workaround for this issue. ITS is working on an update to the HCM Import program to correct this issue.

ESTIMATED RESOLUTION: ITS is currently working on a fix for this issue and will have the resolution in production as soon as possible.

MORE INFORMATION AND SUPPORT: For business impact issues, contact the ITS Helpdesk at helpdesk@usg.edu or via the ITS Customer Services website.
