REMINDERS

Securing Sensitive Data

1099 Reporting includes a great deal of sensitive data that must always be kept secure. Users should safeguard information on secure sites as they work through this process and be especially careful with all documents, such as Copy B's containing Social Security numbers. If users do not know where to download information in a secure area, contact the institution's Technical Support Administrator.

In addition, if users need to submit sensitive data with an ITS Helpdesk ticket, use the USG secure file transfer site [MoveIT](#) to send files. For more information on how to send secure files, see the [Managed File Transfer job aid](#).

Important Dates

Section 6071(c) of tax code requires users to file 1099's with the IRS on or before the following dates:

CHAPTER 1: WITHHOLDING PROCESSING INTRODUCTION

This guide is designed to provide an overview of the tasks involved with Withholding Processing. The guide shows users how to process Withholding Forms for a calendar year, as well as how to complete tasks throughout the year for smooth withholding processing.

1099 Withholding Reportable Items are those items payable to unincorporated entities (individuals, sole proprietors, or partnerships) for services, non-employee compensation, rents, royalties, or prizes and awards. Each institution is responsible for tracking its Withholding reportable items, sending reports to individual suppliers, and sending a file to the IRS noting reportable items and suppliers.

Due to the possibility of IRS changes each year, users should verify they are working from the most recent version of this manual. This user's guide does not provide legal tax advice on what is and is not reportable. This guide only provides guidance on how to process withholding information.

Withholding Income

Typically, employees of a business receive a W-2 form that lists income received throughout the year. This W-2 form also contains deductions taken from that income in the form of federal and state taxes, deferred compensation, Social Security contributions, etc.

Unlike W-2s, independent suppliers receive a 1099-MISC or 1099-NEC form, which is a record of income received from an organization. On this form, income earned is noted but there typically will not be any deductions for federal or state income taxes nor any deferred compensation, Social Security or medical deductions.

Withholding income is also reported to the Internal Revenue Service (IRS) so that the IRS can track income received by taxpayers. A Withholding Supplier is obligated to make his/her own tax deductions and forward payments to the IRS, if required.

For more information regarding tax laws and who should receive a 1099-MISC and 1099-NEC form, please see the IRS website and other important links below:

1099 Withholding Types and Classes

Withholding Types allow withholding transactions to be categorized by classes. Before CY2020 institutions produced one form for all Withholding miscellaneous income regardless of withholding type and class. However, beginning CY2020, USG Institutions produce two forms to report miscellaneous income to the IRS: 1099-MISC forms and 1099-NEC forms. Each Withholding Type is described below:

Withholding Type 1099N

Reported on form 1099-NEC (Non-Employee Compensation)

The most common type of 1099 income is non-employee compensation (NEC). Beginning with calendar year 2020, institutions use Form 1099-NEC to report non-employee compensation.

For questions or more information on the 1099-NEC, refer to IRS publication [here](#).

Withholding Type 1099M

Reported on form 1099-MISC (Miscellaneous Income)

Institutions use the 1099-MISC form to report other reportable miscellaneous income.

For questions or more information about 1099-MISC, refer to IRS publication [here](#).

As determined by the IRS, the minimum Withholding Reporting Amounts for each Withholding Type/Class for CY2022 are below.

CHAPTER 3: 1099 TASKS THROUGHOUT THE YEAR

Though 1099 Withholding Processing is typically completed in January for the previous calendar year, however users must complete certain tasks throughout the year. These include:

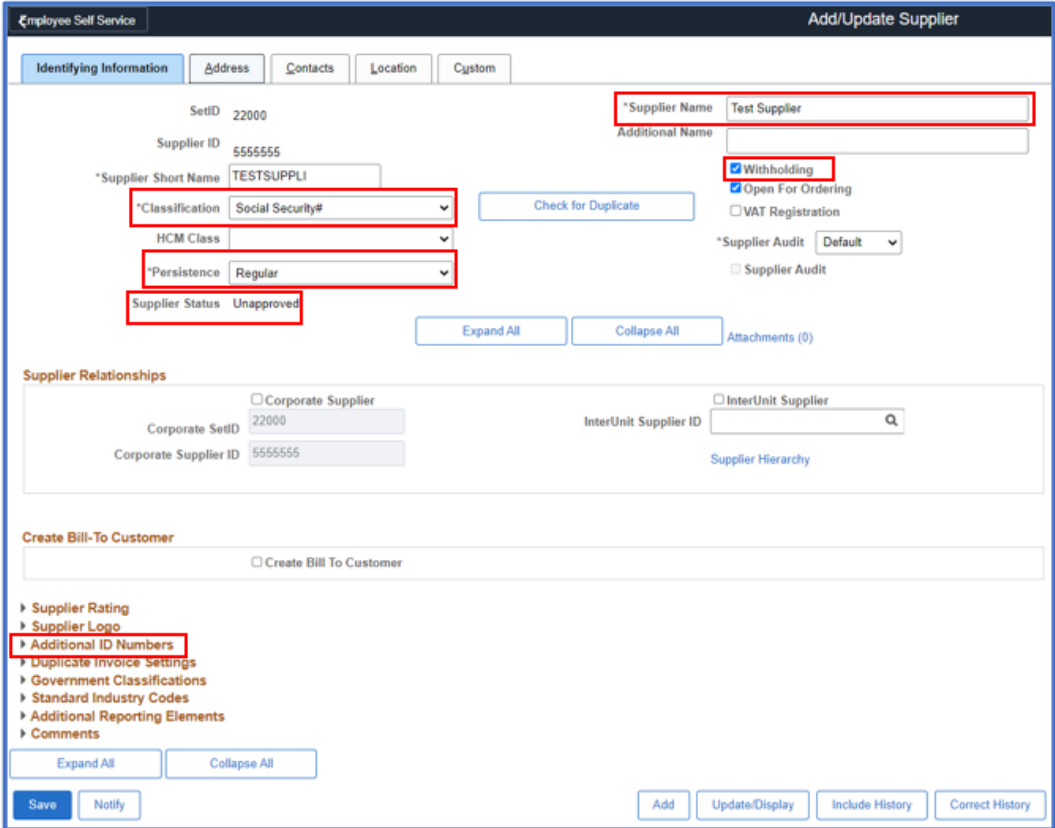

- Entering Withholding Suppliers
- Creating Withholding Vouchers
- Posting Withholding Vouchers

Entering Withholding Suppliers

To report Withholding Information, users must set up each supplier in the system as a Withholding Supplier. Withholding information can be added to supplier information at any time, but it is recommended users add Withholding Information as they create a supplier in the system as this allows all subsequent vouchers entered for that supplier to be automatically flagged for withholding reporting.

For institutions utilizing SHARE suppliers, notify the Shared Services Center at oneusgconnectsupport@usg.edu if the withholding status or withholding class is incorrect on an existing supplier or to add a new withholding applicable SHARE supplier.

Step	Action
1.	As users enter a Withholding Supplier into the system, most of the steps will be the same as entering any other supplier. For step by step instructions on how to enter a supplier in the system, see SP.020.010 – Adding a Supplier .
2.	Below is a review of the fields users enter for Supplier identifying information: <ul style="list-style-type: none"> • Supplier Short Name • Supplier Name 1 • Additional Name(if necessary) • Supplier ID: NEXT • Persistence: Set to “Regular” for a Withholding Supplier. • Classification: Choose “Federal” for corporate Suppliers. For individuals, choose “SSN.”
3.	Also, newly created Suppliers save as “Unapproved” and must be approved by another authorized user. For more information on this process, see SP.020.031 – Approving Suppliers .

Step	Action
4.	<p>On the Identifying Information tab, select the Withholding checkbox. This turns on the Withholding flag in the system as shown below.</p> 
5.	<p>Under the Additional ID Numbers group box, enter the Tax Identification Number (TIN). At this point, it is helpful to check to see if there is a duplicate supplier in the system with the same name or TIN.</p> <p>ITS recommends users investigate to see if the Supplier already exists or if there is an incorrect name or TIN in the system. For more information on this process, see SP.020.012 – Searching Suppliers Based on Criteria.</p> <p>Note: If a duplicate Supplier exists, users receive a warning indicating a potential duplicate exists. However, this warning does not prevent users from adding this supplier into the system.</p>

- On the Address tab, enter the Supplier's main address, Supplier's email address and phone information. If an alternate payment/withholding name is needed to print on the supplier check and Copy B's, navigate to the Payment/Withholding Alt Names group box and enter the alternate information.

If information is entered into the Payment/Withholding Alt Names group box, the system generates payments for the location associated with this address and the system uses the alternate name information on the payment forms. Also, if users enter an alternate withholding name, the system uses this name on withholding reports instead of the name specified on the Identifying Information page.

The screenshot shows the 'Add/Update Supplier' form in the 'Address' tab. The form is titled 'Employee Self Service' and 'Add/Update Supplier'. Report ID: B0RRY010 Date: 12/22/2022 @ 13:50:28 DB=FFRC1 Version#: 5.62 Page: 1

The calculated reportable amount must meet the minimum for that Withholding Class to be reported.

Example 1: If the institution plans to process 1099s for a B Business Unit, PeopleSoft will process these separately from other transactions. For example, say a voucher exists for Business Unit 53000 for Supplier 0000000001 (SSN 123456789) for \$500 that is withholding applicable to 1099N - Class 01. Another voucher exists in the same Calendar Year for Business Unit 5300B for Supplier 0000000002 (SSN 123456789) for \$500 that is also withholding applicable to 1099N – Class 01.

Both vouchers will show up on the BORRY010 report as non-withholding applicable since they do not meet the \$600 threshold for Withholding 1099N – Class 01. Users need to determine whether to combine these voucher payments and this decision will determine what is reported to the IRS, as well as whether this Supplier receives a Copy B from the institution.

Example 2: If there is a payment not included on the 1099 Reportable Transactions Report and the user believes the payment should be included, check the supplier record and compare it to the voucher in question. For example, if the effective date of a Supplier Location/Address is updated to a date greater than the date on the voucher, then the system will not pick up the payment.

CHAPTER 6: CORRECTIONS AND ADJUSTMENTS OF 1099 ITEMS

After completing a review of the Withholding items, users may find some items need to be adjusted. As mentioned in the previous chapter, for transactions to be reported both the supplier and voucher need to be marked as Withholding.

There are a couple of different ways to make withholding adjustments. Users can adjust Withholding manually or through Withholding Supplier Update or Withholding Invoice Line Update. Before making any manual adjustments, ITS recommends users run the BOR_AP_1099_ADJUST query to use as a comparison tool making updates.

Withholding Invoice Line Update (Update VoucherLine Withholding)

The Withholding Invoice Line Update process is used to update withholding information for a specific voucher or voucher line. Users can change the withholding applicability, entity, type and jurisdiction per voucher line. As with Withholding Supplier Updates, changes do not take effect until the Withholding Update Process runs.

Below are step by step instructions on how to perform Withholding Invoice Line Update.

Step	Action
1.	Navigate to the NavBar icon.
2.	Navigate to the Navigator icon.
3.	Select the Suppliers link.
4.	Select the 1099/Global Withholding link.
5.	Select the Maintain link.
6.	Select the Update VoucherLine Withholding link.
7.	To complete the process, search by SetID and Supplier ID. <i>Note: For institutions using Share Suppliers, enter SHARE in the Supplier SetID field. Enter the Business Unit number (e.g., 53000) in the Criteria on the next page.</i>

Step	Action
8.	<p>On the Withholding Invoice Line Update page, there are four group boxes along the top above the Details section:</p> <ul style="list-style-type: none"> • Vendor: summary of the supplier to update • Criteria: enter the Business Unit and the Beginning and Ending Dates of the Withholding reporting year. Once users click Search in this group box, all vouchers entered for this Supplier during the same reporting year will be listed in the Details section. The selection 'Clear Updated Withholding' in the Criteria group box can be used to delete completed update requests from the staging table upon save. • Defaults: used if updating many lines to withholding (Set All Lines to Wthd) or not withholding (Set All Lines to No Wthd). Users can enter the withholding class combination to apply to updated voucher lines. • Tax Reporting Year: enter beginning and ending dates of the tax reporting year.
9.	<p>The voucher lines available for updating are in the Details section. The Current Withhold checkbox indicates whether the line is set for Withholding or not.</p> <p>Under "New Withhold," users can set the new Withholding status. If users change a line from Withholding to Not Withholding, the Type, Jurisdiction and Class fields will update to a blank value. If changing a line from Not Withholding to Withholding, users will need to specify the Type, Jurisdiction, and Class.</p>
10.	<p>After saving the page, users can go to the New Withhold Details tab to show what the new withholding status is, as well as the status of the update.</p> <p>Note: <i>The status of the update displays as "Pending" until the Withholding Update Process runs.</i></p>

Running Withholding Update Process

The Update Withholdings process must run after making changes using either the Withholding Supplier Update Process or the Withholding Invoice Line Update Process. The Update Withholdings process is also known as AP_WTHD_UPDT.

By running this process, the system updates the withholding transactions adjusted and updates the underlying voucher tables as well.

Below are step by step instructions on how to perform Withholding Invoice Line Update.

Step	Action
1.	Navigate to the NavBar icon.
2.	Navigate to the Navigator icon.
3.	Select the Suppliers link.
4.	Select the 1099/Global Withholding link.
5.	Select the Maintain link.
6.	Select the Update Withholdings link.
7.	Find an Existing Value or Add a new Value for the Run Control ID .
8.	On the Withhold Update Request page, select the appropriate Process Option depending on the method used to make the adjustments. If the Supplier Withholding Update method was used, select Process Only Supplier Updates. If the Voucher Line Withholding Update method was used, select Process Only Voucher Lines.

Step	Action
9.	<p>After the process completes successfully, return to the Update Supplier Withholdings or Update Voucher Line Withholdings pages to confirm updates processed. On the New Withhold Details tab for both pages, the Criteria should show “Updated” for those items changed.</p> <p>Note 1: <i>This process may take several minutes to run. Users cannot select Business Unit on the Run Control Page. When this process runs it updates for all business units.</i></p> <p>Note 2: <i>Although users can run Withhold Update Request manually if needed, ITS recommends users allow scheduled instances to process to updates. This will help prevent multiple instances from running, an issue that may adversely affect performance.</i></p> <p><i>During the month of January, ITS will schedule this process to run several times each day. Only one instance of this process will run at one time. If users run a second instance while the first one is running, the second process shows a status of ‘blocked’ in the process monitor. Once the first instance is completed, the next one should begin processing.</i></p>

Manual Adjustments

Adjust Withholding

Users can also adjust withholding manually, if needed. This process is for manually adjusting posted withholding transactions by Supplier or adding withholding entries from a legacy or third-party system. Adjustments for any transactions entered via journal entry must be done manually.

Whenever possible, ITS advises users to make withholding adjustments through [Withholding Supplier Update](#) or [Withholding Invoice Line Update](#). These types of adjustments update the underlying Withholding tables, unlike the manual adjustments.

Below are step by step instructions on how to adjust withholding manually.

Step	Action
1.	Navigate to the NavBar icon.
2.	Navigate to the Navigator icon.
3.	Select the Suppliers link.
4.	Select the 1099/Global Withholding link.
5.	Select the Maintain link.
6.	Select the Adjust Withholding link.
7.	Enter the Supplier SetID and the Supplier ID for the supplier that requires a manual adjustment. Users make manual adjustments for specific Suppliers when needed. On the Search page, users can search for a range of Suppliers by Supplier SetID, Supplier ID or Supplier Location.
8.	Click Search .
9.	On the Withhold Adjustments page, search for any adjustments previously made. To do this, enter the following in the Search Criteria: <ul style="list-style-type: none"> • Business Unit • Entity: IRS • Type: 1099M or 1099N (DO NOT CHOOSE ANY OTHER TYPE) • Jurisdiction: FED • Start Date and End Date: beginning and ending of Withholding reporting calendar year

Step	Action
	<p>For institutions using SHARE Suppliers, enter SHARE in the Supplier SetID field. In the Business Unit field, enter the Business Unit number (e.g., 53000).</p>
10.	<p>After hitting the Search button, any adjustments made will be listed. If there are none, users can begin entering adjustments on Line 1.</p> <p>If adjustments are retrieved in the Search results, make sure there is no existing line for the Withholding Type/Class combination.</p> <p>If lines do exist with the same Type/Class combination, users can either modify the existing line by the amount of the necessary adjustment or insert a new adjustment line.</p>

11. When entering a new adjustment, enter the following for each line on the Main Information tab:

- Business Unit
- Entity: IRS
- Type: 1099M or 1099N (DO NOT CHOOSE ANY OTHER TYPE)
- Jurisdiction: FED
- Class
- Rule

The screenshot shows the 'Withhold Adjustments' form. At the top, it displays '72000 Supplier: 0000400763 MAIN Heldolph Brinkmann'. Below this is a 'Search Criteria' section with fields for Business Unit (72000), Entity, Jurisdiction, Type (1099), Class, Start Date (01/01/2020), and End Date (12/31/2020). A 'Search' button is highlighted with a red box. Below the search criteria is the 'Adjustments' section with tabs for 'Main Information', 'Transaction Info', 'Payment Information', and 'Adjustment Reason'. The 'Main Information' tab is selected and highlighted with a red box. It contains a table with the following data:

Short Name	*Business Unit	*Entity	*Type	*Jurisdiction	*Class	*Rule		
Original	72000	IRS	1099N	FED	01	RULE0	+	-
Original	72000	IRS	1099N	FED	01	RULE0	+	-
Original	72000	IRS	1099N	FED	01	RULE0	+	-

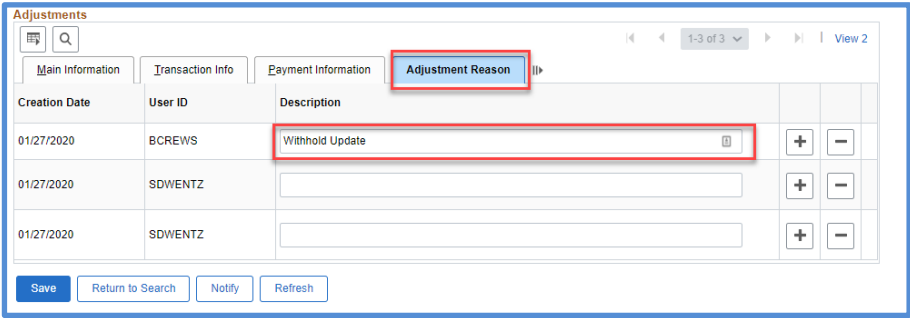

Buttons at the bottom include 'Save', 'Return to Search', 'Notify', and 'Refresh'.

12. On the Transaction Info tab enter amounts and dates. Under “Basis Amt,” enter the amount on which the Withholding is calculated. This is the basis amount reported to the Withholding entity for this payment and is typically the gross amount of the voucher.

The screenshot shows the 'Adjustments' form with the 'Transaction Info' tab selected and highlighted with a red box. It contains a table with the following data:

Basis Amt	Liability Amt	Paid Amount	Payment Date	Declaration Date		
2012.87	0.00	0.00	12/31/2020	12/31/2020	+	-
2600.00	0.00	0.00	02/12/2020	02/12/2020	+	-
2320.50	0.00	0.00	11/07/2020	11/07/2020	+	-

Buttons at the bottom include 'Save', 'Return to Search', 'Notify', and 'Refresh'.

13.	<p>The Liability Amount displays the amount of backup withholding retained to remit to the withholding entity.</p> <p>The Paid Amount displays the amount of the withholding liability paid to the withholding entity.</p> <p>Since the GeorgiaFIRST model is not currently using actual withholding for payments these two fields should always be zero.</p>
14.	<p>For Payment Date, all adjustments should have a Payment date of December 31 of the Withholding reporting year.</p>
15.	<p>In addition, the Declaration Date displays the date on which the withholding is declared.</p> <p>The Declaration Date should be the same date that we entered for Payment Date, which is December 31 of the Withholding reporting year.</p>
16.	<p>On the Adjustment Reason tab, there is space available for users to indicate why they made an adjustment. The Creation Date is generated by the system and reflects the date the adjustment was entered. The User ID refers to the person who made the adjustment. For the Description, include a reference as to why the adjustment was made.</p> <p>Note: Users may sometimes notice a second User ID on this page that is not part of their institution. This additional User ID may display because the withholding update process runs for all institutions every time the process is started. The User ID displayed on the Adjustment Reason tab is the last system user to run the process.</p>  <p>The screenshot shows a web interface titled 'Adjustments'. It has several tabs: 'Main Information', 'Transaction Info', 'Payment Information', and 'Adjustment Reason'. The 'Adjustment Reason' tab is selected. Below the tabs is a table with columns for 'Creation Date', 'User ID', and 'Description'. There are three rows of data. The first row has '01/27/2020' for Creation Date, 'BCREWS' for User ID, and 'Withhold Update' for Description. The other two rows have '01/27/2020' for Creation Date and 'SDWENTZ' for User ID, but their Description fields are empty. To the right of each row are '+' and '-' buttons. At the bottom of the table are buttons for 'Save', 'Return to Search', 'Notify', and 'Refresh'.</p>

| 17. | Each transaction row entered is then added to the Withholding Transaction table (WTHD_TRXN_TBL). It is also added to or subtracted from the totals already in the Withholding Transaction table. |
|-----|--|

Again, it is a good idea to run the BOR_AP_1099_ADJUST query before and after performing manual adjustments to ensure adjustments were entered correctly.

After Making Withholding Adjustments

After users finish making all necessary adjustments, review the 1099 items again as previously discussed in [Chapter 5: Review 1099 Items](#). Review, make corrections and then re-review until all necessary updates and corrections are made.

CHAPTER 7: RUNNING WITHHOLDING REPORT POST

After all adjustments are made and all Withholding payments are reviewed again to ensure no further corrections are needed, run the Withhold 1099 Report Job process. This job performs both the Withhold 1099 Report Post process (1099_RPT_PST) and the Generate Withholding Reports process (AP_APY1099).

The 1099 Report Post application engine process populates the Withholding Table by extracting data from the Withhold Transaction table and inserts it into the Withholding Table if it exceeds the reporting threshold.

The Generates Withholding Reports process creates a flat file for the IRS and populates the “Withholding to Send” and “Copy B” tables. The system then uses the data to create a file for the tax entity, or IRS and forms for the Suppliers. The system also uses the data to process corrections.

Below are step by step instructions on how to run the Withhold 1099 Report Post process.

Step	Action
1.	Navigate to the NavBar icon.
2.	Navigate to the Navigator icon.
3.	Select the Suppliers link.
4.	Select the 1099/Global Withholding link.
5.	Select the 1099 Reports link.

CHAPTER 8: REVIEW WITHHOLDING REPORTABLE TRANSACTIONS

Once users generate Withholding Reports, then review all 1099 reportable transactions before producing the final reports. Once users produce the IRS_001.TXT file, review the appropriate queries and reports. See [Chapter 5: Review 1099 Items](#) before producing the Copy B forms.

BORRY010 1099 Reportable Transactions Report

The BORRY010 1099 Reportable Transactions Report listed here is the same report as the report in [Chapter 5](#) . Previously, not all columns were completed because the Withholding 1099 Report Post process and the Generating Withholding Reports process was not yet completed. With these two processes completed, run the BORRY010_1099 report again to verify all columns are marked complete.

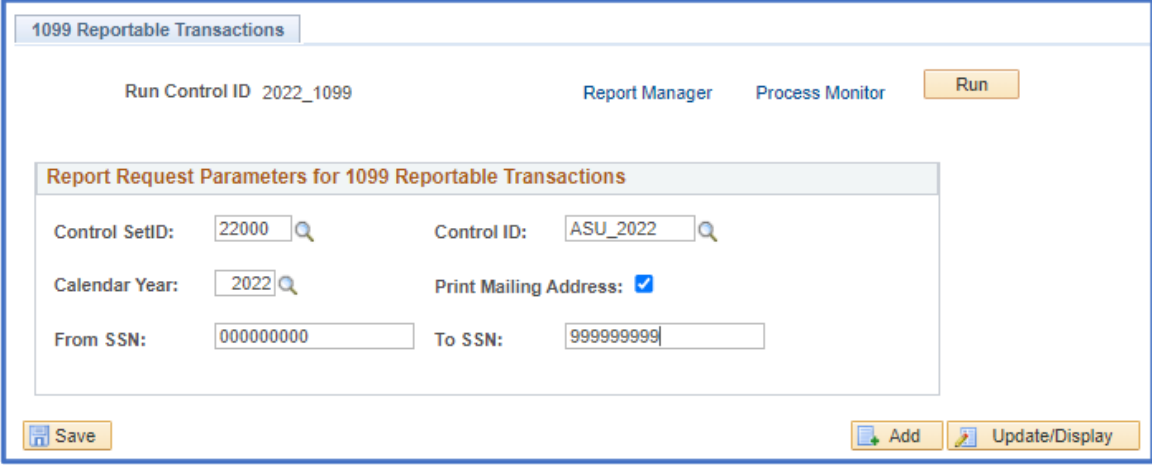

NOTE: *Until the Withhold 1099 Report Post and Withhold 1099 Report processes run, not all columns on the report will populate. Only the Amount, Amt Under Minimum, and Calculated Reportable Amount columns will populate. The Reported Amount and Difference columns will not populate until the other processes run.*

BOR AP 1099 SND DTL TOT Query

Users can run the BOR_AP_1099_SND_DTL_TOT query to obtain reportable totals grouped by class. These reportable totals should match both the total on the BORRY010 report and the 1099 Withholding to Send Detail Report. Once users obtain totals for the 1099 Withholding to Send Detail Report, balance and finalize the 1099s.

Below are step by step instructions on how to run the BOR_AP_1099_SND_DTL_TOT query.

Step	Action
1.	Navigate to the NavBar icon.
2.	Navigate to the Navigator icon.
3.	Select the Reporting Tools link.
4.	Select the Query link.
5.	Select the Query Viewer link.
6.	In the Search by field, enter " BOR_AP_1099_SND_DTL_TOT " and then press the Search button. Users can run this query to either HTML or to MS Excel. Both formats open in a new window.
7.	To run the query, enter the following parameters: <ul style="list-style-type: none"> • 1099 Year • Business Unit
8.	From the query results, compare the "Sum Basis Amount" with the Grand Totals on the BORRY010 – 1099 Reportable Transactions Report to confirm these totals are the same for each Withholding code. Also, users can compare the "Sum Basis Amount" and the "Count SetID" from the query with the totals in the IRS_001.TXT file. Users can locate the count and totals in "Record Type C" (Payor End of Data Record). <div style="text-align: center; border: 1px solid black; padding: 10px; margin: 10px 0;">  </div>

Step	Action
9.	Differences in the count may be a result of Suppliers with multiple address sequences in the 1099 Withholding to Send Detail Report. The system will combine these Suppliers in the IRS_001.TXT file, causing the IRS_001.TXT file to show a lower count.
10.	The count provided in the "Count SetID" column is the number of 1099s to be produced for that specific withholding code. Since the same 1099 may include multiple withholding codes, a 1099 may be included in counts for more than one withholding code.
11.	Once users balance and finalize 1099s, produce the 1099 Copy B Reports for Suppliers.

CHAPTER 9: PRODUCING WITHHOLDING COPY B REPORTS

The 1099 Copy B Reports are reports users print out and mail to Suppliers. Complete this step after making all adjustments and balancing 1099s as instructed previously. To produce Withholding Copy B Reports, run the Print 1099 Copy B job (process APCOPYB).

Step	Action
9.	ITS strongly recommends users review 1099-MISC and 1099-NEC Copy B forms before printing them. Users can compare Copy B forms with the BORRY010–Reportable Transactions Report , which prints in TIN order. Also, users can compare the Copy B forms to the 1099 Withholding to Send Detail Report , which prints in Supplier ID order.
10.	Compare the number of Copy B forms printed with the number shown in the IRS_001.TXT file as part of the finalization process.
11.	After reviewing the Copy B forms, download the forms to a secure location on a computer and then print them using Adobe Reader so the Copy B forms print correctly. Note: The text on the Copy B’s is noticeably smaller when printing from PeopleSoft within a browser window.
12.	After printing, mail the Copy B forms to Suppliers.

CHAPTER 10: COMPLETING 1099 PROCESSING FOR THE YEAR

Once Copy B reports have been verified and mailed, users should send the IRS_001.TXT file(s) to the IRS.

Sending the IRS 001. Txt file

When users are ready to send the IRS_001.TXT file, send it electronically to the IRS. For detailed instructions on sending this file, refer to IRS Publication 1220. Users can find this publication on the IRS website [here](#). Users can also find more detailed information from the IRS about Withholding Payments [here](#).

The due date for IRS Electronic Filing is January 31, 2023.

ITS does not provide instructions on how to submit the institution's file to the IRS. Users can read more about filing electronically at the IRS website [here](#) and how to submit the institution's file at the IRS FIRE Production System [here](#).

Next Steps

1. If the file is accepted by the IRS, run the [Withhold Sent Process](#).
2. If the file is accepted by IRS, but a correction file is needed for a supplier, run the [Correction File Process](#).
3. If the file is rejected by the IRS, run the [Replacement File Process](#).

Running the Withhold Sent (WTHD_SNT) Process

The final step in the entire Withholding process is to run the Withhold Sent Process. Use the Withhold Sent page (WTHD_SNT) to request a run of the Withholding Sent File Application Engine process (WTHD_SNT). This prepares the institution's return information to make corrections and refile, if needed.

This application engine process finalizes the Withholding reporting and file creation process. This process records all the data in the file sent in the Withholding Sent tables (PS_WTHD_SENT_DTL and PS_WTHD_SENT_HDR) and deletes the data from the Withholding to Send tables (PS_WTHD_TO_SND_DTL and PS_WTHD_TO_SND_HDR).

Users should not run this process until they send the IRS_001.TXT file to the IRS and receive confirmation of successful transmission. The system uses this information when creating correction or replacement files.

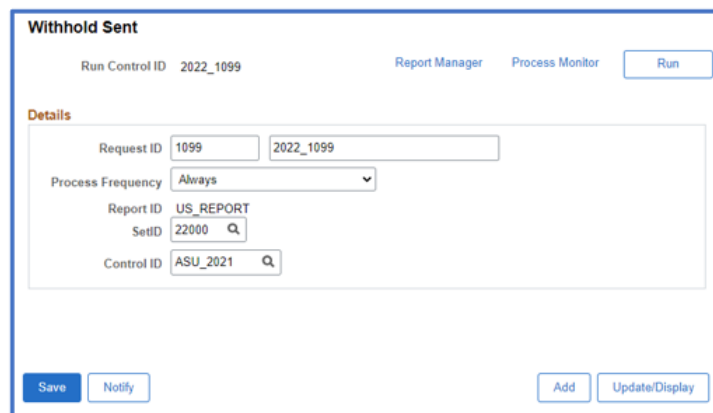

Below are step by step instructions on how to run the Withhold Sent process.

Step	Action
1.	Navigate to the NavBar icon.
2.	Navigate to the Navigator icon.
3.	Select the Suppliers link.
4.	Select the 1099/Global Withholding link.
5.	Select the 1099 Reports link.
6.	Select the Withholding Sent File link.
7.	Select or Add a Run Control ID .

8. Enter parameters. The parameters for this process are:

- Request ID and Description
- Process Frequency: Set to “Always”
- SetID
- Control ID: Use the Control ID used through the current Withholding year’s processing (e.g., USO_2021).
- IRS Options: Leave these settings as defaulted. The box should not be selected. The Withhold Sent Option should remain set to All.

Step	Action
9.	Select "WTHD_SNT" process and click OK .
10.	Once the process runs to Success and is Posted, then Withholding processing for the year is officially complete.

Creating a Correction File

IMPORTANT: IF THE INSTITUTION ALREADY SUBMITTED THE ORIGINAL/REPLACEMENT FILE TO THE IRS, THE WITHHOLD SENT (WTHD_SNT) PROCESS MUST RUN BEFORE MAKING ANY CORRECTIONS.

If a user identifies an error with the file after the IRS accepted and processed it and the file is in “Good, Released” status, the user needs to file a corrected return. Do not file the original file again as this may result in duplicate reporting. File only the returns that require corrections.

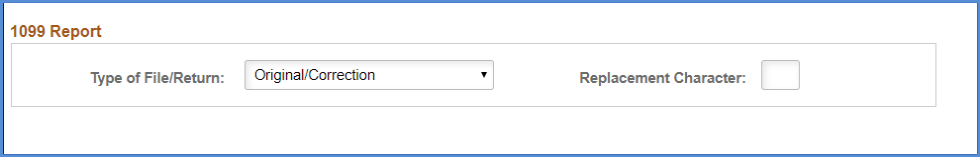

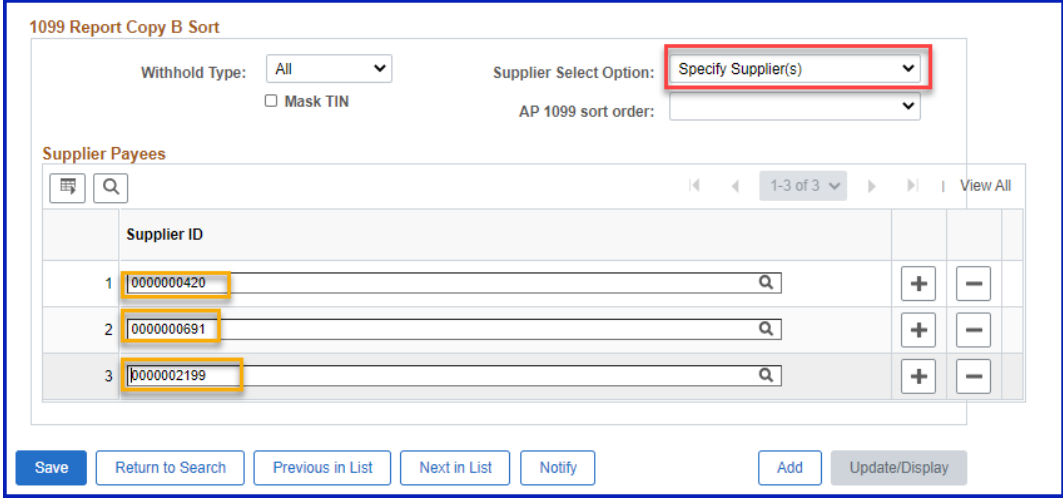

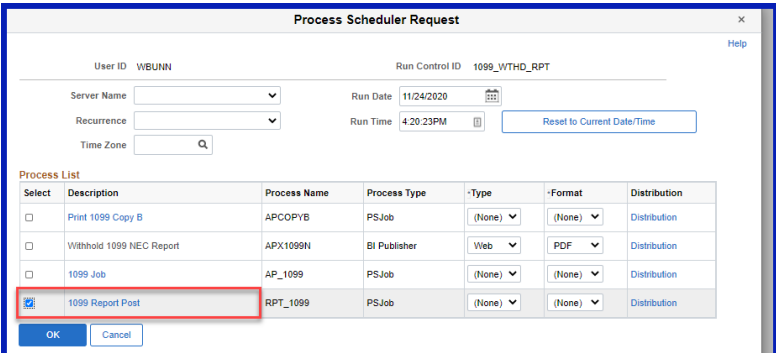

As noted above, users must run the Withhold Sent Process before making and processing corrections. If users forget to run this process, they may need to manually submit the correction file.

If it is determined that incorrect data was reported for a supplier or a group of suppliers, a user needs to create a correction file. To correct the transaction data within the PeopleSoft Payables system, do one of the following:

- Adjust the individual voucher lines for the supplier using the Withholding Invoice Line Update page and running the Withholding Update process for the supplier(s).
- Enter an adjustment on the Withhold Adjustments page for the supplier(s).
- Enter a new voucher for the supplier(s).

Below are step by step instructions on how to create a correction file.

Step	Action
1.	Confirm the Withholding Sent File process ran for previous submissions and corrections to the IRS.
2.	Make the necessary withholding corrections. Adjust the individual voucher lines for the supplier using the Withholding Invoice Line Update.
3.	Run the Update Withholdings process.
4.	Navigate to the NavBar icon.
5.	Navigate to the Navigator icon.
6.	Select the Suppliers link.
7.	Select the 1099/Global Withholding link.
8.	Select the 1099 Reports link.

Step	Action
9.	Select the Withhold 1099 Report Job link.
10.	After the process runs again, select the Original/Correction option on the Withhold 1099 Report Post page. 
11.	Select "Specify Supplier(s)" in the Supplier Select Option. Next, add the supplier(s) that were adjusted in Step 2. 
12.	Click the Save button.
13.	Select Run .
14.	Run the Withhold 1099 Report Post . 

Step	Action																																			
15.	Save the IRS_001.TXT file.																																			
16.	Run Copy B process for selected suppliers that were adjusted in Step 2. <div style="border: 2px solid blue; padding: 10px; margin: 10px 0;"> <p>Process List</p> <table border="1"> <thead> <tr> <th>Select</th> <th>Description</th> <th>Process Name</th> <th>Process Type</th> <th>Type</th> <th>Format</th> <th>Distribution</th> </tr> </thead> <tbody> <tr> <td><input checked="" type="checkbox"/></td> <td>Print 1099 Copy B</td> <td>APCOPYB</td> <td>PSJob</td> <td>(None) ▾</td> <td>(None) ▾</td> <td>Distribution</td> </tr> <tr> <td><input type="checkbox"/></td> <td>Withhold 1099 NEC Report</td> <td>APX1099N</td> <td>BI Publisher</td> <td>Web ▾</td> <td>PDF ▾</td> <td>Distribution</td> </tr> <tr> <td><input type="checkbox"/></td> <td>1099 Job</td> <td>AP_1099</td> <td>PSJob</td> <td>(None) ▾</td> <td>(None) ▾</td> <td>Distribution</td> </tr> <tr> <td><input type="checkbox"/></td> <td>1099 Report Post</td> <td>RPT_1099</td> <td>PSJob</td> <td>(None) ▾</td> <td>(None) ▾</td> <td>Distribution</td> </tr> </tbody> </table> <p>OK Cancel</p> </div>	Select	Description	Process Name	Process Type	Type	Format	Distribution	<input checked="" type="checkbox"/>	Print 1099 Copy B	APCOPYB	PSJob	(None) ▾	(None) ▾	Distribution	<input type="checkbox"/>	Withhold 1099 NEC Report	APX1099N	BI Publisher	Web ▾	PDF ▾	Distribution	<input type="checkbox"/>	1099 Job	AP_1099	PSJob	(None) ▾	(None) ▾	Distribution	<input type="checkbox"/>	1099 Report Post	RPT_1099	PSJob	(None) ▾	(None) ▾	Distribution

17.	Save the Copy B reports.																																			
18.	Send the corrected IRS_001.TXT correction file to the IRS.																																			
19.	After the IRS accepts the correction file, run the Withholding Sent File process again.																																			

Creating a Replacement File

Once the file is sent to the IRS and the Withholding Sent File process runs, users are finished with the Withholding reporting process unless the IRS rejects the file because of formatting errors. In that case, the IRS may tell the user what is invalid in the file either through contact information user provide or on their internet page, where the file is stored. Make the necessary changes and resubmit the file.

Below are step by step instructions on how to create a complete replacement file.

Note: Users can create a replacement file only if one original file was sent to the IRS.

Step	Action
1.	Navigate to the NavBar icon.
2.	Navigate to the Navigator icon.
3.	Select the Suppliers link.
4.	Select the 1099/Global Withholding link.
5.	Select the 1099 Reports link.
6.	Select the Withhold 1099 Report Job link.
7.	Complete the parameters in the 1099 Report Post and the 1099 Report group boxes. In the 1099 Report group box, select Replace in the Type of File/Return field, and enter the replacement character provided to user by the IRS in the Replacement Character field (The replacement character should be left blank if the IRS does not provide a replacement character.)
8.	Run the 1099 Report processes. The system generates a new replacement file that user can send to the IRS.
9.	Run the Copy B Report Processes again.
10.	After sending the replacement file to the IRS and it is accepted, make sure to run the Withholding Sent File process.
11.	For replacement files, run the Withholding Sent File process a second time.

The APX7020 Report prints all Withholding Types and Classes. There are seven Withholding Types in the system which may show up on the report:

- 1099: 1099 Withholding (1099 Miscellaneous income withheld before CY2020)
- 1099M: 1099 Miscellaneous Withholding
- 1099N: 1099 NEC Withholding
- 1099G: Certain Government Payments
- 1099I: Interest Income

For any withholding reporting years after CY2019, institutions will only use 1099M and 1099N Withholding Types and Classes.
