EP.010.081 – ADDING/UPDATING ADDITIONAL PROJECT APPROVER

Purpose	To add/update an additional Project Approver.
Description	The Project Approver page can be used to specify new approvers. The users specified on this page must also have the appropriate security roles to approve the requisition. By default, the project approval workflow routes to only one project manager which is defined on the Project ChartField Values page. If the institution wishes to have multiple project approvers, use the Project Approver page.
Security Role	**BOR_GL_CHARTFIELDS_PRJ**
Dependencies/ Constraints	Project exists in PeopleSoft. Additional Project Approvers must have their security roles and user preferences assigned before they are able to take approval action.
Additional Information	Before using this page for the first time, submit a Support ticket to make a change to the institution's workflow configuration.
