#### General Information

#### Known Issue Information

##### Resolved Known Issue:

KI9.2-173\_Other– Issue When Using Type Ahead/Autocomplete Functionality

**RESOLUTION:** As of Release 6.06, dated June 7, 2025, an Oracle fix was applied to resolve this issue. PeopleSoft will now display accurate results when utilizing a search field for data containing a comma.

**ORIGINAL KNOWN ISSUE:** Following Release 6.00, an Oracle bug exists that affects the Type Ahead/Autocomplete functionality for search fields containing a comma. When utilizing a search field containing a comma, PeopleSoft will display ::: characters instead of the comma. If users select the search result, an error message may display, or the search result may return a "No matching values were found" message.

## Table Changes- N/A

Sometimes releases include table changes that may affect third-party integrations. ITS recommends that all institutions using institution-specific integrations such as SAS, Business Objects, or other reporting software test these integrations prior to the release.

Institution resources responsible for local integrations and reporting may notice the new fields (table columns) in the database. ITS is not changing any business process or PeopleSoft Financials functionality as a result of these table changes.
