
VOID/REISSUE PAYMENTS FOR PRE-CONVERSION VOUCHERS

This job aid focuses on how to void and reissue payments for pre-conversion vouchers. A pre-conversion voucher is a voucher that was created with the institutional Supplier SetID prior to Supplier conversion to the SHARE SetID. These vouchers were paid, closed, or otherwise processed prior to the Supplier conversion.

After the Supplier conversion, certain actions cannot be taken on a pre-conversion voucher—specifically any action that requires the SAVE function. Some examples include, but are not limited to, adding attachments, changing payment method or location, putting a voucher ‘on hold’, changing account Chartstrings.

There are two (2) methods for voiding/reissuing payments for pre-conversion vouchers:

- Option 1: No Changes Required to Voucher
- Option 2: Changes Required to Voucher

IMPORTANT: Do not select the Void Payment and Re-Open Voucher(s)/Put on Hold option for pre-conversion vouchers. If this option is selected the user will not be able to remove the “On Hold” option and process the pre-conversion voucher.

For pre-conversion vouchers that require to be put on Hold when voiding payment, please follow the [Pre-Conversion Vouchers, Do Not Void and Put on Hold](#) instructions.

Option 1: No Changes Required to Voucher

When there are no expected changes to a pre-conversion voucher, such as payment location or payment method, users can follow the business process [AP 020 540 – Canceling a Payment](#). This will void the payment and open a new payment line on the pre-conversion voucher. The user will then be able to pay the voucher through running pay cycle.

Screenshot below shows what a user sees when voiding/reissuing a pre-conversion voucher that does not require changes:

Option 2: Changes Required to Voucher

If a user needs to void a payment and make changes to the pre-conversion voucher, such as address, location, or payment method, then follow the process below for a pre-conversion voucher.

Since the POs for pre-conversion vouchers have been reconciled prior to Supplier Conversion, the PO will not be able to be reopened, nor can the encumbrance be restored. The user will only be able to liquidate the remaining liability.

1. Void/Do Not Reissue/Close Liability. This will void the payment and close the voucher.

Screenshot below shows what a user sees when voiding/reissuing a pre-conversion voucher that requires changes:

2. Click Save. For PO vouchers, when a user clicks Save, the following alert message appears:

Payment Schedule selected for cancellation has at least 1 PO Voucher. Do you wish to continue? (7030,622)

YES - will restore encumbrance, liquidate liability, and reopen the PO/Line Schedule for future invoicing for the unreconciled PO's selected.

NO - will only liquidate the liability for all vouchers

The subsequent voucher posting will automatically unmatch the voucher if your answer is YES. If the answer is NO then Unmatching will NOT be performed.

Note: This process cannot be Undone.

3. Since the PO for pre-conversion vouchers have been reconciled prior to Supplier Conversion, click No to only liquidate the liability.
4. Create a new voucher with the SHARE Supplier ID to pay the supplier.

IMPORTANT: For Pre-Conversion Vouchers, Do Not Void and Put on Hold

Do not select the Void Payment and Re-Open Voucher(s)/Put on Hold option for pre-conversion vouchers. If this option is selected the user will not be able to remove the “On Hold” option and process the pre-conversion voucher.

Screenshot below shows what **not** to do:

If it will be necessary to put a voucher on hold after the payment is voided, follow one of the two methods below:

Method 1

1. Follow [Option 1: No Changes Required](#).
2. Put voucher payment on hold through the pay cycle.

Method 2

1. Follow [Option 2: Changes Required](#).
2. Put voucher payment on hold through voucher payment tab or through the pay cycle.
