

## Known Issue: KI9.2-72\_EX Incorrect Chartstrings on Fluid Expense Report When Accounting Defaults Changed

POSTED: December 1, 2017

**STATUS:** Active

When an Expense Report is created, the Accounting Details on all expense lines are populated with the Default ChartField Values listed on the traveler's Expense Profile. When a user creates a Fluid Expense Report, adds expense lines, then attempts to change the Chartstring using Accounting Defaults, the Chartstring is not updated on every expense line.

The steps that cause this issue to occur are outlined below:

Navigation: Click the Create Expense Report tile from the Fluid Employee Self Service homepage.

A new Expense Report will display. Click Add Expense to add expense lines.

## **Functional Workaround:**

To prevent incorrect Chartstrings from populating an expense report when you need to change the Accounting Defaults, use one of the two functional workarounds below:

- 1. Create Expense Reports using the Classic navigation (use the Navigation bar to select **Employee Self-Service > Travel and Expenses > Expense Reports > Create**).
- 2. Create a Fluid Expense Report and update the Accounting Defaults <u>prior</u> to adding expense lines.

Estimated Resolution: An Oracle fix for this issue will be included in a future release.
