Resolved: Known Issue - KI9.2-150_EX: First or Last Day of Travel Meal Deduction Not Working on Copied Fluid Expense Reports

UPDATED:  December 20, 2021

STATUS:  Resolved

RESOLUTION:  A fix was applied and the First or Last Day of Travel link is now working on copied Fluid Expense reports.

ISSUE:  When a user copied an expense report with a meal expense line(s) from the Fluid Create Expense Report tile, the First or Last Day of Travel link did not calculate the meal deduction correctly. Additionally, if the copied meal expense line had the First or Last Day of Travel deduction applied in the original expense report, the meal deduction could not be removed in the copied version.
