

Resolved: Known Issue - KI9.2-118_BP - Budget Prep Load Not Updating Annual Benefits Base Rate in OneUSG Connect

UPDATED: March 18, 2020

STATUS: Resolved

RESOLUTION: As of OneUSG Connect Release 6.00, changes were made to the Budget Prep Load process to correct update logic for both fields. Department Entry Date now only updates if rows staged for Budget Prep Load include a change in HR Department. Job Entry Date now updates if rows staged for Budget Prep Load include a change in Job Code.

NAVIGATION: OneUSG Connect > Navigator > Workforce Administration > Job Information > Job Data

ISSUE: The Budget Prep Load process failed to update Department or Job Entry dates correctly for employees with changes to Department or Job Code fields. Typically, Department Entry Date on Job updates if the employee's position changes HR Departments, and Job Entry Date on Job updates if the employee's Job Code changes.

However, Budget Prep Load updated Department Entry Date if an employee's Department or Job Code changed, but did not update the employee's Job Entry Date. The location where users can reference an employee's Job Entry date on the Job Information page is shown below:

Job Information ?	
Effective Date	07/01/2019
Effective Sequence	0
HR Status	Active
Payroll Status	Active
<hr/>	
Job Code	[REDACTED]
Entry Date	03/01/2019

ORIGINALLY POSTED: June 17, 2019
