Data Element Dictionary Updates

• Instruction Level Code (CRS005) – Business Practice: The code NR should be used to identify courses that the institution has designated as placeholders (i.e. placeholder course for study abroad). Use of this code will allow the course to be collected but not included in the credit hour or course enrollment reports. This code will also exclude the placeholder course from being counted in the student’s credit hours attempted. When NR is used on a course, all course sections will be impacted.
