## Release Notes for Banner Baseline 7.x and Georgia Enhancements 7.0

### Introduction

This release is an upgrade from Banner baseline 6.x and the Georgia Enhancements 6.x to Banner baseline 7.x and the Georgia Enhancements 7.0

**Description**

This document includes release notes for the February 2006 release of Georgia Enhancements 7.0. Release notes for SCT Banner baseline products are not reproduced here, but are available on the ftp server with the release. However, known issues and notes from the comprehensive testing of Banner 7.x and the Georgia Enhancements 7.0 are included in this document.

**Best Practice**

You are strongly urged to apply this release to your test environment before applying it to production.

**Target Audience**

This document is written for technical support staff at the institutions and for Banner functional users.

**Impact**

Implementation is mandatory.

By December 2006, all University System of Georgia Institutions using Banner are required to upgrade to Banner 7.x and the Georgia Enhancements 7.x.

**Future Releases**

OIIT will distribute SCT baseline patches for production-critical defects in both the 6.x and 7.x environments and correct any production-critical defects in both the Georgia Enhancements 6.x and 7.x environments. Development of future Georgia Enhancements will occur in the 7.x environment.

**Database/Application Server Technical Stack**

For information about the technical stack and the upgrade plan, select the Banner/GaBEST 7.x link from the Banner Production Support Web site at: https://www.usg.edu/banner.

**Upgrade Path and Final Release Versions**

The upgrade path and final release versions follow.

| | |
|---|---|
| Operating System | HP-UX 11.11 or Solaris 2.9 |
| Oracle RDBMS | 9.2.0.6 |
| Oracle Application Server IAS | 9.0.4.1 or 9.0.4.2 |

| | |
|---|---|
| Accounts Receivable | 7.0, 7.1 and 7.2 |
| Financial Aid | 7.0, 7.1, 7.2, 7.21, 7.3 and 7.4 |
| General | 7.0, 7.1 and 7.2 |
| Integration Components | 7.0 and 7.1 |
| Self-Service Faculty and Advisors | 7.0, 7.1 and 7.2 |
| Self-Service Student | 7.0, 7.1 and 7.2 |
| Student | 7.0, 7.1, 7.2 and 7.2.1 |
| Voice Response | 7.0 |
| WebCT | 7.0 |
| Web General | 7.0 and 7.1 |
| Web Tailor | 7.0, 7.1 and 7.2 |

**Upgrade path and Final Release Versions for the Client Workstation**

| | |
|---|---|
| Oracle Forms and Reports | 9i |
| OS | Windows 2000 or above |

**Customized Installation of Banner and the Georgia Enhancements**

If you are installing Banner and the Georgia Enhancements manually, a document addressing the following topics is available:

- Recommended order of application for the upgrade
- Location of software
- Notes and/or warnings for specific upgrades

The location of this document on ftp.usg.edu is:

banner/prod/docs/7/upgrades7

**OIIT Technical Notes for Banner Baseline 7.x and Patches**

OIIT applied SCT Banner baseline patches before testing and certification, and they are part of the upgrade to 7.x. Upgrade documentation and text files from SCT describing defects corrected are on ftp.usg.edu.

| | |
|---|---|
| Order in which to apply Banner 7x Upgrades | banner/prod/docs/7/upgrades7 |
| OIIT's Summary Notes | banner/prod/docs/7/patchesdoc |

**Prerequisites**

Prerequisites for the Georgia Enhancements 7.0 are as follows:

- Accounts Receivable 7.1

- Financial Aid 7.3

- General 7.1

- Student 7.1

- Georgia Enhancements 6.9

**Certification**

Testing and certification of Georgia Enhancements 7.0 was also done at the following versions of Banner baseline:

- Accounts Receivable 7.2

- Financial Aid 7.3

- General 7.2

- Student 7.2

# Technical Information

This section summarizes the technical changes to the Georgia Enhancements 7.0

## *Technical Changes*

**New and/or Modified Forms**

| Form | Name | Descriptive Title |
|------|------|-------------------|
| **New** | None | |
| **Modified** | ZFRHEXF | HOPE Excluded Fund Code Rules |
| | ZFRHOPE | HOPE Fund Code Rules |
| | ZGADDWS | Direct Debit Worksheet Transaction Form |
| | ZGADEBS | Direct Debit Subscription Form |
| | ZGRDEBT | Direct Debit Rules Form |
| | ZHAHOPE | HOPE Eligibility Form |
| | ZHAHPEX | HOPE Exclusions Form |
| | ZHARCON | Reconciliation Query Form |
| | ZHASGRD | SAP Alternative Grade Code Form |
| | ZHATERM | Georgia GPAs Course History Form |
| | ZHATPRT | Transcript Type Rules Form |
| | ZLABSUP | Supplemental Building Information Form |
| | ZLARBDG | Building Identifier Translation Form |
| | ZLARSUP | Supplemental Room Information Form |
| | ZLTFOVR | Facilities Information Override Form |
| | ZOACPCD | CPC Desired Courses Rules Form |
| | ZOACPCF | CPC Fulfilling Courses Rules Form |
| | ZOACPCT | CPC Test Rules Form |
| | ZOACPCU | CPC Used Courses Form |
| | ZOAGARE | Georgia Requirements Establishment Rules Form |

| | |
|---|---|
| ZOAGARH | Georgia Requirements Hold Rules Form |
| ZOAGARP | Georgia Requirements Form |
| ZOAGARQ | Georgia Requirements Rules Form |
| ZOAGARS | Georgia Requirements Security Form |
| ZOAGART | Georgia Requirements Test Rules Form |
| ZOAHSCD | High School Detail Information Form |
| ZOAHSGR | High School Grade Definition Form |
| ZOAINDP | Index Information Form |
| ZOAINDX | Index Calculation Rules Form |
| ZOALHCD | History/Constitution Desired Courses Rules Form |
| ZOALHCF | History/Constitution Fulfilling Courses Rules Form |
| ZOALHCU | History/Constitution Used Courses Form |
| ZOALSAT | Learning Support Attempts Tracking Form |
| ZOARESI | Residency Information Form |
| ZOASAPR | Satisfactory Academic Progress Applicant Form |
| ZOASCLV | Semester Conversion Level Code Translation Form |
| ZOASLVL | Regents' Student Level Rules Form |
| ZOQOLIB | Georgia Enhancements Form Library |
| ZORRULE | Financial Aid Selection Rules Form |
| ZORSAPR | SAP Group Rules Form |
| ZPAIMHD | Immunization Hold Rules Form |
| ZPAIMMU | Immunization/Medical Information Form |

| | |
|---|---|
| ZPARESD | Residency/Waiver Code Translation Form |
| ZSADDSD | Direct Deposit Subscription Form |
| ZSADETC | Detail Code Control Form – Student |
| ZSAMISC | Miscellaneous Transaction Form |
| ZSICHFD | Chartfield Validation and Inquiry Form |
| ZSRDDRU | Direct Deposit Rules Form |
| ZSRMASS | Detail Code Accounting Mass Data Entry Form |
| ZTVCNST | Building Construction Code Validation Form |
| ZTVCOND | Building Condition Code Validation Form |
| ZTVCONG | Congressional District Validation Form |
| ZTVGARQ | Georgia Requirements Type Validation Form |
| ZTVHPEL | HOPE Eligibility Status Validation Form |
| ZTVHPER | HOPE Eligibility Reason Validation Form |
| ZTVHSGR | High School Grade Code Validation Form |
| ZTVIMMU | Immunization Code Validation Form |
| ZTVIMST | Immunization/Medical Status Code Validation Form |
| ZTVINDX | Index Code Validation Form |
| ZTVINST | Institution Code/Name Validation Form |
| ZTVOWNC | Building Ownership Code Validation Form |
| ZTVPGCL | Program Class Code Validation Form |
| ZTVPRIM | Primary Use Code Validation Form |
| ZTVPROC | Process Definition Form |

| | | |
|---|---|---|
| | ZTVRUSE | Room Use Code Validation Form |
| | ZTVSGRP | SAP Group Validation Form |
| | ZTVSLVL | Regents' Student Level Code Form |
| | ZTVSTAT | E-Mail Status Definition Form |
| | ZTVTIER | HOPE Tier Validation Form |
| | ZTVWKAR | Work Area Validation Form |
| | ZURAEML | E-Mail Additional Information Form |
| | ZUREHIR | E-Mail Hierarchy Definition Form |
| | ZUREMRU | E-mail Rules Form |
| | ZUREPLS | E-Mail Process/Letter/Status Control Form |
| | ZURMAIL | E-Mail Text Rules Form |
| **Obsolete** | ZSACRSQ | Regents Reporting Course Query Form |
| | ZSADEDU | Distance Education Course Information Form |
| | ZSANONI | Non-Institutional Course Information Form |
| | ZSAOFFC | Off Campus Course Information Form |
| | ZTVCTYP | Distance Education Course Type Validation Form |
| | ZTVDETC | Distance Technology Code Validation Form |
| | ZTVEXSC | External Site Code Validation Form |
| | ZHARQTC | Transcript Request Form |
| | ZOACAMP | Campus Code Translation Form |
| | ZOACIPE | CIP Extension Rules Form |
| | ZOACNTY | Georgia County Code Translation Form |
| | ZOADEPT | Department Code Translation Form |

| | ZOAETHC | Ethnic Code Translation Form |
|---|---|---|
| | ZOANCST | Requirement Status Translation Form |
| | ZOANORM | SBGI/NORM Code Translation Form |
| | ZOATRMT | Term Code Translation Form |
| | ZTVACCT | Account Number Validation Form |

**New and/or Modified Processes**

| Process | Name | Descriptive Title |
|---|---|---|
| **New** | None | |
| **Modified** | skel_zorgsal.h | Include file for Grad Sal Svv Extract Process |
| | ZAQAFEE | Add Registration Fees Rpt |
| | ZAQCASN | Accts Rec Supervisory Rpt |
| | ZAQCSHT | Fin Aid Srce Code T Trans |
| | ZAQFDTL | AR Detail Data by Acct Nbr |
| | ZAQFREC | AR Summary Data by Acct Nbr |
| | ZAQRFND | Refund By Total Rules Report |
| | ZAQRGFE | Fee Assessment Rules Report |
| | ZAQTBDS | Term Based Designator Data Rpt |
| | ZAQTERM | Term Code Data Report |
| | ZAQTPRF | Supervisor Restricted User Rpt |
| | ZFBGEXP | State Grant File Export |
| | ZFRNSLC | Clearinghouse Extract Report |
| | ZFRTMST | Time Status Calculation Update |
| | ZGRARLD | PS AR Banner Load Program |
| | ZGRDACH | Direct Debit ACH Process |
| | ZGRDIRD | Bank Rout Num Load Process |
| | ZGRPSLD | Non Banner Fin. Data Load |
| | ZHRFARR | Fin Aid Reconciliation Process |

| | |
|---|---|
| ZHRGHIL | HOPE Invoicing Reconciliation |
| ZHRHINV | HOPE Invoicing Extract |
| ZHRPDHR | Paid Hours Load Process |
| ZHRRTLD | Regents Test Score Load |
| ZHRSMSK | SSN Masking Process |
| ZHRTRTC | USG Academic Transcript |
| ZLRFINV | Regents' Facility Inventory |
| ZOBSAPR | Satisfactory Academic Process |
| ZOBSGRP | SAP Group Assignment |
| ZOPGFTT | ZURGFTT Purge Process |
| ZORCIRR | CIR Extraction Process |
| ZORCPCR | CPC Requirement Update Process |
| ZORCPED | CPE Requirement Update Process |
| ZORCPER | CPE Results Update Process |
| ZORECOR | ECORE Extract |
| ZORFARS | ZORFARS Data Extraction |
| ZORFIRR | Facility Inventory Extraction |
| ZORGARU | Georgia Requirement Update |
| ZORGSAL | Grad Sal Svv Extract Process |
| ZORHHSL | HOPE High School Load Process |
| ZORHSFB | Feedback Extract Process |
| ZORHTGA | HOPE Transfer GPA Recalculation |
| ZORINDC | Admissions Index Calculation |
| ZORINFR | RCTINFR Load Process |
| ZORLHCR | Legislative Req Update Process |
| ZORLSUI | LS Increment Update Process |

|  |  |  |
|---|---|---|
|  | ZORLSUP | Learning Support Hours Report |
|  | ZORPRQD | Pre-Requisite Check/Delete |
|  | ZORRGPA | Regents GPA Recalculation |
|  | ZORRQCR | Georgia Requirement Creation |
|  | ZORRTPR | Regents' Testing Program Update Process |
|  | ZORRURR | Room Utilization Extraction |
|  | ZORSIRS | SIRS Extraction Process |
|  | ZORVLIB | Voyager Library Extraction |
|  | ZPRHOLD | Generic Hold Set Process |
|  | ZPRIMMU | Immunization Req. Creation |
|  | ZRPWST1 | CWSI Load Process |
|  | ZRPWST2 | CWSI Update Process |
|  | ZRRWSTD | CWSI Remaining Balance Rpt |
|  | ZSRMSUM | Working Area Summary Report |
| **Obsolete** | ZORPDCL | PeopleSoft General Person Load Process |

**New and/or Modified Packages**

| Package | Name | Descriptive Title |
|---|---|---|
| **New** | ztgkauth.sql | Package to handle web authorizations mirroring the functionality of the tvaauth form. |
|  | ztgkddeb.sql | To store direct debit codes separately |
|  | ztgkwbdd.sql | Package to handle all web Direct Deposit functionality. |
| **Modified** | None |  |
| **Obsolete** | None |  |

**NOTE**

The following are Banner baseline V7 components that include OIIT modifications:

- RPEPCKG.pco – Modifications to package HOPE Scholarship funds completely for students in all types of processing scenarios.

- UVARTN.cob – Modifications to package HOPE Scholarship funds completely for students in all types of processing scenarios.

- twbkwbi1.sql  - HOPE Book Fund Authorization Enhancements (including SSN Masking for the Web functionality)

- twbkwbis.sql - HOPE Book Fund Authorization Enhancements (including SSN Masking for the Web functionality)

**WARNING**

The Self-Service Financial Aid Award by Term Components are not included in the Georgia Enhancements 7.0 release.

The HOPE Accumulation/Eligibility Process (ZORHGPA) is not included in the Georgia Enhancements 7.0 release.

## *Technical Notes*

**Local Area Network
File Server**

Portions of this release will reside on the local area network file server.  Please forward this announcement to appropriate technical support staff at your institution.

**Domain Name
System Registration**

Several of the University System Office Applications require that institutions transfer data to and from OIIT servers using FTP.  For security purposes, OIIT requires that computers making FTP connections to our central services be registered with a name in the Domain Name System (DNS), and registration in the DNS is a common practice.  To have your computer registered, or to verify that it is registered, please contact your local technical support staff for your institution.  An institution's network support group is often the group responsible for DNS registrations.

OIIT recommends that all computers connected to the Internet have a registration entry in the DNS.

## Functional Information

This section summarizes the functional changes to the Georgia Banner Enhanced Student and Financial Aid Systems for 7.0

The Georgia Enhancements 7.0 release includes modifications to all forms and processes to incorporate the new "look and feel" of the Banner baseline V7 deliverables. In an effort to conform to baseline standards, the following issues were remediated for the Georgia Enhancement forms and processes:

- SunGard Higher Education Solutions (SHES) has a new standard of spelling out abbreviations. Most abbreviations on field names in Georgia Enhancements have been expanded.

- Block headers have been incorporated in multi-block forms.

- Fixed Length property fields have been implemented to force users to enter values for fields with the appropriate number of characters. **Note**: Oracle has discontinued the fixed-length property field.

- There is a new SHES standard to apply international number formatting to all number fields. This functionality has been incorporated in all Georgia Enhancements.

- SHES has added Code/Description prompts to customize the text color for visual identification of searchable/LOV fields to the General User Preferences Maintenance form (GUAUPRF).

- In Banner Baseline V7, SHES has changed how they process creation of generated IDs and PIDMs. Instead of using SOBSEQN, an Oracle sequence is now being used.

- Titles of List of Value (LOV) boxes were added and/or corrected.

- Corrections have been made so that the LOVs work in a standardized manner for all Georgia Enhancement processes.

- Parameters in the .lis files have been reordered to match the order in Job Submission.

- As part of the 7.0 Baseline UI standard design, when a code description is display only, there will be no text box. When a field is actually 'updatable,' the text boxes will be visible.

A list of additional modifications to specific forms and processes follows.

# Defect Corrections and Enhancements

## *Defect Correction for Admissions Index Calculation Form (ZORINDC)*

**ZORINDC Defect Correction**

The Admissions Index Calculation form did not display an error message in the hint text line if an invalid value was entered in the "Run Mode" parameter (06). The LOV did not provide query access for the "Selection Identifier" parameter (02).

**Functional Impact**

LOV functionality will now be available for applicable parameters. Also, validation will be performed for applicable parameters

## *Defect Corrections and Enhancements for CPE Results Update Process (ZORCPER)*

**ZORCPER Defect Corrections and Enhancements**

The CPE Results Update Process did not display an error message in the hint text line if an invalid value was entered in the "Run Mode" parameter (12).

The following enhancements were made to the CPE Results Update Process:

- Default run mode for process has been changed from "update" to "audit."

- USER_ID has been added to the parameter list on the generated .lis file.

**Functional Impact**

Validation will now be performed for applicable parameters. Also, the process will run in "audit" mode as a default and the parameters have been updated in the .lis file.

## *Enhancements for CPE Requirement Update Process (ZORCPED)*

**ZORCPED Enhancements**

The following enhancements were made to the CPE Requirement Update process:

- USER_ID has been added to the parameter list on the generated .lis file.

- The following parameters were renamed for consistency:

  o Test Start Date = Start Date

  o End or Remove Hold = Update/Delete

**Functional Impact**

The parameters have been updated in the .lis file.

## *Defect Corrections and Enhancements for History/Constitution Requirements Update Process (ZORLHCR)*

**ZORLHCR Defect Corrections and Enhancements**

The History/Constitution Requirements Update process did not display an error message in the hint text line if an invalid value was entered in the "Run Mode" parameter (10).

The following enhancements were made to the History/Constitution Requirements Update Process:

- Default run mode for process has been changed from update to audit.

- USER_ID has been added to the parameter list on the generated .lis file.

- The following parameter was renamed for consistency:

  - Print Mode = Report Print Mode

**Functional Impact**

Validation will now be performed for applicable parameters. Also, the parameters have been updated in the .lis file.

## *Defect Corrections and Enhancements for Clearinghouse Extract Report (ZFRNSLC)*

**ZFRNSLC Defect Corrections and Enhancements**

The Clearinghouse Extract Report did not display the version number in the .lis file output next to the process title, under the page number. Also, ZFRNSLC was not accessible via direct access.

The following enhancements were made to the Clearinghouse Extract Report:

- The Grade Level Code parameter has been added to the .lis output.

- The Address Hierarchy parameter has been relocated between Report Flag and Report Date on the .lis output.

**Functional Impact**

The version number is now reflected in the .lis file and parameters have been updated. Also, the process is now accessible via direct access as well as through job submission (GJAPCTL).

## *Defect Corrections for Time Status Calculation Update (ZFRTMST)*

**ZFRTMST Defect Correction**

The Time Status Calculation Update was not accessible via direct access.

**Functional Impact**

The process is now accessible via direct access as well as through job submission (GJAPCTL).

## *Defect Corrections and Enhancements for Regents' Test Score Load Process (ZHRRTLD)*

**ZHRRTLD Defect Corrections and Enhancements**

The Regents' Test Score Load process did not display the version number in the .lis file output next to the process title under the page number. Also, ZHRRTLD was not accessible via direct access.

The following enhancements were made to the Regents' Test Score Load Process:

- The Update/Audit Mode parameter in both job submission (GJAPCTL) and .lis file output has been modified to read "Run Mode."

- The Address Hierarchy parameter is relocated between Report Flag and Report Date parameters on the .lis output.

**Functional Impact**

The version number is now reflected in the .lis file and parameters have been updated. Also, the process is now accessible via direct access as well as job submission (GJAPCTL).

## *Enhancements for CPC Requirement Update Process (ZORCPCR)*

**ZORCPCR Enhancements**

The following enhancements were made to CPC Requirement Update Process:

- Default run mode for process has been changed from "update" to "audit."

- USER_ID has been added to the parameter list on the generated .lis file.

- "Print Mode" parameter has been renamed to "Report Print Mode."

**Functional Impact**

The version number is now reflected in the .lis file and parameters have been updated.

## *Defect Corrections and Enhancements for Georgia Requirement Update Process (ZORGARU)*

| **ZORGARU Defect Corrections and Enhancements** | The Georgia Requirement Update process LOV did not provide query access for parameters 05 (Selection Identifier) and 06 (Application).  Corrections have been made so that the LOVs work in the same manner as other Georgia Enhancement processes. |
| --- | --- |
| | The following enhancement was made to CPC Requirement Update Process: |
| | • USER_ID has been added to the parameter list on the generated .lis file. |
| **Functional Impact** | LOV functionality will now be available for applicable parameters. Also, the version number is now reflected in the .lis file and parameters have been updated. |

## *Defect Corrections and Enhancements for LS Increment Update Process (ZORLSUI)*

| **ZORLSUI Defect Corrections and Enhancements** | The LS Increment Update process LOV did not provide query access for parameters 07 (Selection Identifier) and 08 (Application). Also, the "Creator ID" parameter has been modified to be an optional parameter. |
| --- | --- |
| | The following enhancements were made to CPC Requirement Update Process: |
| | • USER_ID has been added to the parameter list on the generated .lis file. |
| | • Default run mode for process has been changed from "update" to "audit." |
| **Functional Impact** | LOV functionality will now be available for applicable parameters. Also, parameters have been updated in the .lis file. |

## *Defect Corrections and Enhancements for Learning Support Hours Report (ZORLSUP)*

| **ZORLSUP Defect Corrections and Enhancements** | The Learning Support Hours Report LOV did not provide query access for parameter 05 (Selection Identifier). The process did not display the version number in the .lis file output next to the process title, under the page number. |
|---|---|
| | The following enhancements were made to Learning Support Hours Report: |
| | • USER_ID has been added to the parameter list on the generated .lis file. |
| | • "Applicant ID" parameter has been renamed to "Student ID." |
| **Functional Impact** | LOV functionality will now be available for applicable parameters. Also, the version number is now reflected in the .lis file and parameters have been updated. |

## *Enhancements for Pre-Requisite Check/Delete Process (ZORPRQD)*

| **ZORPRQD Enhancements** | The following enhancement was made to Pre-Requisite Check/Delete Process: |
|---|---|
| | • USER_ID has been added to the parameter list on the generated .lis file. "Applicant ID" parameter has been renamed to "Student ID." |
| **Functional Impact** | The parameters have been updated in the .lis file. |

## *Defect Corrections for Regents' GPA Recalculation Process (ZORRGPA)*

| **ZORRGPA Defect Corrections** | The Regents' GPA Recalculation process LOV did not provide query access for Selection Identifier parameter 05. The process did not display the version number in the .lis file output next to the process title, under the page number. Also, ZORRGPA was not accessible via direct access. |
|---|---|
| **Functional Impact** | LOV functionality will now be available for applicable parameters. The version number is now reflected in the .lis file and parameters have been updated. Also, the process is now accessible via direct access as well as job submission (GJAPCTL). |

## *Defect Corrections and Enhancements for Georgia Requirement Creation Process (ZORRQCR)*

**ZORRQCR Defect Corrections and Enhancements**

The Georgia Requirement Creation process LOV did not provide query access for Selection Identifier parameter 01. The process did not display the version number in the .lis file output next to the process title, under the page number.

The following enhancements were made to CPC Requirement Update Process:

- USER_ID has been added to the parameter list on the generated .lis file.

- Default run mode for process has been changed from "update" to "audit."

**Functional Impact**

LOV functionality will now be available for applicable parameters. The version number is now reflected in the .lis file and parameters have been updated. Also the process will run in "audit" mode as the default.

## *Defect Correction for Voyager Extraction Process (ZORVLIB)*

**ZORVLIB Defect Correction**

The Voyager Extraction process did not display the version number in the .lis file output next to the process title, under the page number.

**Functional Impact**

The version number is now reflected in the .lis file.

## *Enhancement for Regents' Testing Update Process (ZORRTPR)*

**ZORRTPR Enhancement**

The following enhancement was made to Regents' Testing Update process:

- USER_ID has been added to the parameter list on the generated .lis file.

**Functional Impact**

The parameters have been updated in the .lis file.

## *Defect Corrections and Enhancements for Georgia Requirements Form (ZOAGARP)*

| | |
|---|---|
| **ZOAGARP Defect Corrections and Enhancements** | When accessing the ZOAGARP form, if you performed a "next block" from the key block when the ID field was blank, ZOAGARP asks if you want to create requirements and creates Georgia Requirements. Corrections have been made to incorporate an error message when trying to create requirements without entering a valid ID in the key block.

The Georgia Requirements Form was missing field labels for the following:

- USER ID

- NCRQ Codes

- Description

- CPC Deficiencies Count |
| **Functional Impact** | Users will encounter an error message when trying to perform a "next block" function from the key block without entering a valid ID first. Fields are labeled appropriately. |

## *Defect Correction for Georgia Requirements Type Validation Form (ZTVGARQ)*

| | |
|---|---|
| **ZTVGARQ Defect Correction** | The Georgia Requirement Type Validation Form was not available on any Georgia Enhancement menu. |
| **Functional Impact** | The Georgia Requirements Type Validation Form can now be accessed via the "Georgia Requirements Rules Forms Menu [*GARULES]" under the "Georgia Academic Requirements [*REQUIRED]" menu. |

## *Defect Correction for Regents' Student Level Code Form (ZTVSLVL)*

| | |
|---|---|
| **ZTVSLVL Defect Correction** | The Regents' Student Level Code Form was not available on any Georgia Enhancement menu. |
| **Functional Impact** | The Regents' Student Level Code Form can now be accessed via the "Student Information Reporting System Menu [*SIRS]" under the "Regents Reporting Systems Menu [*REGENTS]" menu. |

## *Defect Correction for Index Information Form (ZOAINDP)*

| | |
|---|---|
| **ZOAINDP Defect Correction** | The Index Information form was missing "rollback" functionality once you entered the second block.  Errors were encountered and the form could not be exited. |
| **Functional Impact** | A rollback function can be performed from all blocks of the form. |

## *Enhancements for History/Constitution Used Courses Form (ZOALHCU)*

| | |
|---|---|
| **ZOALHCU Enhancements** | The History/Constitution Used Courses Form was missing field labels for the following transfer fields:<br><br>• Subject<br><br>• Course Number<br><br>• Credits<br><br>• Grade<br><br>• Title |
| **Functional Impact** | Fields are labeled appropriately. |

## *Defect Correction for Add Registration Fees Report (ZAQAFEE)*

| | |
|---|---|
| **ZAQAFEE Defect Correction** | The Add Registration Fees Report was not accessible via direct access. |
| **Functional Impact** | The process is now accessible via direct access as well as through job submission (GJAPCTL). |

## *Defect Correction for Accounts Receivable Supervisory Report (ZAQCASN)*

| | |
|---|---|
| **ZAQAFEE Defect Correction** | The Add Registration Fees Report was not accessible via direct access. |
| **Functional Impact** | The process is now accessible via direct access as well as through job submission (GJAPCTL). |

### *Defect Correction for Accounts Receivable Detail Data by Account Number (ZAQFDTL)*

| ZAQFDTL Defect Correction | The AR Detail Data by Acct Nbr Report was not accessible via direct access. |
|---|---|
| Functional Impact | The process is now accessible via direct access as well as through job submission (GJAPCTL). |

### *Defect Correction for Accounts Receivable Data by Account Number (ZAQFREC)*

| ZAQFREC Defect Correction | The AR Summary Data by Acct Nbr Report was not accessible via direct access. |
|---|---|
| Functional Impact | The process is now accessible via direct access as well as through job submission (GJAPCTL). |

### *Defect Correction for Refund by Total Rules Report (ZAQRFND)*

| ZAQRFND Defect Correction | The Refund by Total Rules Report was not accessible via direct access. |
|---|---|
| Functional Impact | The process is now accessible via direct access as well as through job submission (GJAPCTL). |

### *Defect Correction for Fee Assessment Rules Report (ZAQRGFE)*

| ZAQRGFE Defect Correction | The Fee Assessment Rules Report was not accessible via direct access. |
|---|---|
| Functional Impact | The process is now accessible via direct access as well as through job submission (GJAPCTL). |

### *Defect Correction for Term Based Designator Data Report (ZAQTBDS)*

| ZAQTBDS Defect Correction | The Term Based Designator Data Report was not accessible via direct access. |
|---|---|
| Functional Impact | The process is now accessible via direct access as well as through job submission (GJAPCTL). |

## *Defect Correction for Term Code Data Report (ZAQTERM)*

| | |
|---|---|
| **ZAQTERM Defect Correction** | The Term Code Data Report was not accessible via direct access. |
| **Functional Impact** | The process is now accessible via direct access as well as through job submission (GJAPCTL). |

## *Defect Correction for Supervisor Restricted User Report (ZAQTPRF)*

| | |
|---|---|
| **ZAQTPRF Defect Correction** | The Supervisor Restricted User Report was not accessible via direct access. |
| **Functional Impact** | The process is now accessible via direct access as well as through job submission (GJAPCTL). |

## *Enhancements for Miscellaneous Transaction Form (ZSAMISC)*

| | |
|---|---|
| **ZSAMISC Enhancements** | The following fields were added to the Georgia Enhancement Miscellaneous Transaction form:<br><br>• Payment Number<br><br>• Merchant ID<br><br>These fields were added to the baseline form in the Accounts Receivable 7x upgrade. |
| **Functional Impact** | Payment Number and Merchant ID fields are accessible on the Miscellaneous Transaction Form. |

## *Enhancement for Detail Code Accounting Mass Data Entry Form (ZSRMASS)*

| | |
|---|---|
| **ZSRMASS Enhancement** | The searchable fields in this form have been modified to recognize the visual identification for code/description prompts in GUAUPRF. |
| **Functional Impact** | Names of fields that are searchable will appear as colored text. |

## *Defect Correction for Financial Aid Source Code T Transaction Report (ZAQCSHT)*

| | |
|---|---|
| **ZAQCSHT Defect Correction** | The Fin Aid Srce Code T Trans Report was not accessible via direct access. |
| **Functional Impact** | The process is now accessible via direct access as well as through job submission (GJAPCTL). |

## *Defect Correction for ZORFARS Data Extraction Report (ZORFARS)*

| | |
|---|---|
| **ZORFARS Defect Correction** | The ZORFARS Data Extraction Report was not accessible via direct access. |
| **Functional Impact** | The process is now accessible via direct access as well as through job submission (GJAPCTL). |

## *Defect Correction for State Grant File Export Report (ZFBGEXP)*

| | |
|---|---|
| **ZFBGEXP Defect Correction** | The State Grant File Export Report was not accessible via direct access. |
| **Functional Impact** | The process is now accessible via direct access as well as through job submission (GJAPCTL). |

## *Defect Correction for Reconciliation Query Form (ZHARCON)*

| | |
|---|---|
| **ZHARCON Defect Correction** | The Reconciliation Query Form was not available on any Georgia Enhancement menu. |
| **Functional Impact** | The Reconciliation Query Form can now be accessed via the "HOPE Excluded Fund Code Rules" menu under the "HOPE Eligibility Tracking" menu. |

## *Defect Correction for HOPE Excluded Fund Code Rules Form (ZFRHEXF)*

| | |
|---|---|
| **ZFRHEXF Defect Correction** | The title of the HOPE Excluded Fund Code Rules Form and the name of the form on the menu have been modified for consistency. |
| **Functional Impact** | The form name will read the same on both the menu and the actual form once accessed. |

## *Defect Correction for SAP Group Assignment Process (ZOBSGRP)*

**ZOBSGRP Defect Correction**　　　　The ZORTSAP_USER_ID field only allowed 8 characters.

**Functional Impact**　　　　Users can now have up to 30 characters in the USER_ID parameter of this process.

## *Enhancements for Title IV and HOPE Authorizations Processing*

**Title IV and HOPE Authorizations Self-Service Enhancement**　　　　The steps to copy local Web menus from baseline menus that existed in Georgia Enhancements 6.9 are no longer required for Georgia Enhancements 7.0. A script has been created to generate Web menu links for local authorization menus.

**Functional Impact**　　　　Users will no longer have to make copies of baseline menus and procedures on Banner Self Service.

**Refer to the Georgia Enhancements 7.0 User Documentation for further information regarding HOPE Authorizations.**

# Known Issues for Georgia Enhancements 7.x

## Admissions Index Calculation (ZORINDC)

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 process:

- If a student has more than one index (i.e., two CSATs) on SOATEST, the process will abort with multiple errors.

Workaround: Ensure that only one entry for each index exists on SOATEST for the student.

Modifications to address this issue will be scheduled for a future 7.x release.

## CPE Requirement Update Process (ZORCPED)

**Known Issues**

The following issues were encountered during internal certification of the Georgia Enhancements 7.0 process:

- If a student has a test and related hold that are updated in the first two rows on the .lis file for that student, the name and ID of the student are listed for each row.
- If the student has a test score that does not meet the pivot score as defined on ZOAGARE, then the process updates the requirement to a required status code (selected from hard coded values of "RS" or "RI") and incorrectly ends any related hold.
- Hold End dates have no validation check and will insert an end date on ZOAGARP even if it is prior to the beginning date of the hold.

Modifications to address these issues will be scheduled for a future 7.x release.

## LS Increment Update Process (ZORLSUI)

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 process:

- If invalid hold codes are used, the process terminates with "Required parameter is missing, aborting job" error message in the .lis file.

Modifications to address this issue will be scheduled for a future 7.x release.

## *Pre-Requisite Check/Delete (ZORPRQD)*

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 process:

- When the process is run in Delete mode, the list of students being deleted does not appear in the .lis file. The process correctly deletes the students.

Modifications to address this issue will be scheduled for a future 7.x release.

## *Regents' GPA Recalculation (ZORRGPA)*

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 process:

- The Student ID parameter is not listed in the .lis file.

Modifications to address this issue will be scheduled for a future 7.x release.

## *Georgia Requirements Form (ZOAGARP)*

**Known Issues**

The following issues were encountered during internal certification of the Georgia Enhancements 7.0 form:

- Boxes around the Description fields in the Deficiencies block seem to have vanished. Data still display correctly, but there is no box outline.

- If a user does not have appropriate permissions to update a requirement, the form does not validate the security permission until the Save function is executed. The current error message does not specify which requirements the user does not have permission to update.

- If a user updates multiple requirements and does not have permission to update some of the requirements, the Save function will not save any of the changes.

Modifications to address these issues will be scheduled for a future 7.x release.

## *Index Information Form (ZOAINDP)*

**Known Issue**

The following issues were encountered during internal certification of the Georgia Enhancements 7.0 form:

- If a value calculated by the "Delete/Calculate Index" button exceeds the defined range on ZTVINDX, it is dropped from ZOAINDP without a warning message.

Modifications to address this issue will be scheduled for a future 7.x release.

## *History/Constitution Used Courses Form (ZOALHCU)*

**Known Issues**

The following issues were encountered during internal certification of the Georgia Enhancements 7.0 form:

- When you Query from the "Course" field under the Institution and Transfer blocks, the Select button in the main toolbar does not activate to allow a user to select a fulfilling course. Workaround: The Shift-F3 keyboard shortcut does work.

- The Selection Indicator field is larger than on other forms.

Modifications to address these issues will be scheduled for a future 7.x release.

## *SSN Masking Process (ZHRSMSK)*

**Known Issues**

The following issues were encountered during internal certification of the Georgia Enhancements 7.0 process:

- Application Code should be above Creator ID in the .lis file parameter list.

- The process does not display the version number in the .lis file output next to the process title under the page number.

Modifications to address these issues will be scheduled for a future 7.x release.

## *High School Detail Information Form (ZOAHSCD)*

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 process:

- The High School Detail Information Form did not correctly display the GPA in the hint line if multiple high schools existed. If the student had multiple high school entries and the GPA was calculated for the second entry from the Subjects block, the hint line displayed the GPA of the first entry. The GPA would populate correctly in the first block for the second entry.

Modifications to address this issue will be scheduled for a future 7.x release.

## *High School Grade Definition Form (ZOAHSGR)*

**Known Issues**

The following issues were encountered during internal certification of the Georgia Enhancements 7.0 form:

- The Institution Query pulls in college codes in addition to the high school codes.

- The "Copy Grades" function does not work after a RollBack function is executed.

Modifications to address these issues will be scheduled for a future 7.x release.

## *Index Code Validation Form (ZTVINDX)*

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 form:

- If a negative number exceeding the maximum number of characters is entered in the Low or High fields, the number is displayed as "##########."

## CPC Used Courses Form (ZOACPCU)

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 form:

- When you Query from the "Course" field under the Institution and Transfer blocks, the Select button in the main toolbar does not activate to allow a user to select a fulfilling course.

WORKAROUND:  The Shift-F3 keyboard shortcut does work.

## Georgia GPAs Course History Form (ZHATERM)

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 form:

- The Quality Points and GPA fields do not appear to be following SHAGPAR rules.

Modifications to address this issue will be scheduled for a future 7.x release.

## Room Utilization Extraction Process (ZORRURR)

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 process:

- The process does not list the version number in the .lis file.

Modifications to address this issue will be scheduled for a future 7.x release.

## Accounts Receivable Data by Account Number (ZAQFDTL)

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 process:

- When a detail code is established using multiple percents for multiple account numbers, the information reported on the ZAQFDTL report output is inaccurate.

Modifications to address this issue will be scheduled for a future 7.x release.

### *Detail Code Accounting Mass Data Entry Form (ZSRMASS)*

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 form:

- Account B field should be in the custom color text for "searchable field."

Modifications to address this issue will be scheduled for a future 7.x release.

### *Non Banner Financial Data Load Process (ZGRPSLD)*

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 process:

- Report totals '0.'

Modifications to address this issue will be scheduled for a future 7.x release.

### *HOPE Invoicing Reconciliation Process (ZHRGHIL)*

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 process:

- The ZHRGHIL parameters skipped from parameter 5 to parameter 7.

Modifications to address this issue will be scheduled for a future 7.x release.

### *HOPE Invoicing Extract Process (ZHRHINV)*

**Known Issue**

The following issue was encountered during internal certification of the Georgia Enhancements 7.0 process:

- The ZHRHINV process encountered the following error: ORA-01427: single-row subquery returns more than one row WRN-ORACERR: Error occurred in file "zhrhinv.pc" at line 2600 WRN-ERRSTMT: Following statement was last statement parsed: select distinct 'Y' into :b0 from SFRSTCR where (((SFRSTCR_PIDM=:b1 a

Modifications to address this issue will be scheduled for a future 7.x release.

# Decommissioned Georgia Enhancement Forms

**Distance Education**

With this release, OIIT is discontinuing support for the Distance Education Forms. On February 2, 2006, a memo to CIR coordinators was distributed via e-mail regarding Curriculum Data Element Modifications for 2006. Forms used for Distance Education will no longer be available to accommodate the implementation of Banner baseline functionality for Summer 2006 reporting.

**Technical Notes**

These forms will not be delivered with the Georgia Enhancements 7.0 release.

**Functional Impact**

The following forms will be no longer be available:

- ZSACRSQ (Regents' Reporting Course Query Form)

- ZSADEDU (Distance Education Course Information Form)

- ZSAOFFC (Off Campus Course Information Form)

- ZSANONI (Non Institutional Course Information Form)

- ZTVCTYP (Distance Education Course Type Validation Form)

- ZTVDETC (Distance Technology Code Validation Form)

- ZTVEXSC (External Site Code Validation Form)

**Refer to the Georgia Enhancements 6.0 Release Notes for further information.**

**USG Transcript Forms**

With the Georgia Enhancements 6.0 release, OIIT discontinued support for the Transcript Request Form. This form was modified to be "query only" with a pop-up text message indicating that the form is obsolete. This form will no longer be available.

**Technical Notes**

This form will not be delivered with the Georgia Enhancements 7.0 release.

**Functional Impact**

The following form will be no longer be available:

- ZHARQTC (Transcript Request Form)

**Refer to the Georgia Enhancements 6.0 Release Notes for further information.**

**Translation Forms**

With the Georgia Enhancements 6.0 release, OIIT discontinued support for the multiple translation forms. These forms were modified to be "query only" with a pop-up text message indicating that the form is obsolete. These forms will no longer be available.

**Technical Notes**

These forms will not be delivered with the Georgia Enhancements 7.0 release.

**Functional Impact**

The following forms will be no longer be available:

- ZOACAMP (Campus Code Translation Form)

- ZOACIPE (CIP Extension Rules Form)

- ZOACNTY (Georgia County Code Translation Form)

- ZOADEPT (Department Code Translation Form)

- ZOAETHC (Ethnic Code Translation Form)

- ZOANCST (Requirement Status Translation Form)

- ZOANORM (SBGI/NORM Code Translation Form)

- ZOATRMT (Term Code Translation Form)

**Refer to the Georgia Enhancements 6.0 Release Notes for further information.**

# Decommissioned Georgia Enhancement Processes

**PeopleSoft General Person Load Process (ZORPDCL)**

With this release, OIIT is discontinuing support for a Georgia Enhancement process. This process can no longer be executed via Job Submission (GJAPCTL).

**Technical Notes**

This process will not be delivered with the Georgia Enhancements 7.0 release.

**Functional Impact**

The following process will be no longer be available:

- ZORPDCL

**PeopleSoft General Person Load Process**

This process was a one time only process to create general person records using the customer.csv file created in PeopleSoft Financials. The process was delivered with the Georgia Enhancements 6.3 release and is no longer needed for processing.

# Known Issues for Banner Baseline

Any non-critical known issues reported after October 31, 2005 will be included in the Release Notes for the Georgia Enhancements 7.1.  Critical issues will be reported immediately over GaBEST.

## *Known Issues in Accounts Receivable (as of October 31, 2005)*

| Form or Process | Current Defect or Contact Numbers | Priority Level | Defect Title and Workaround | Version Defect Noted | Status at SHES according to ActionWeb |
|---|---|---|---|---|---|
| TSRCBIL | 90475 | Level 3 defect – Low | The name prefix (SPBPERS_NAME_PREFIX) and suffix (SPBPERS_NAME_SUFFIX) do NOT print when the value of the PRODUCE SCHEDULE/BILL parameter is Y. The name prefix and suffix should print when running TSRCBIL in schedule/bill mode. | 5.4.1 | Open Defect |
| TGRFEED | 93200 | Level 3 defect  -Low | While running tgrfeed, you may encounter the following error: RUN SEQUENCE NUMBER: ORA-00001: unique constraint (GENERAL.GURFEED_KEY_INDEX) violated WRN-ORACERR: Error occurred in file "tgrfeed.pc" at line 3125 WRN-ERRSTMT: Following statement was last statement parsed: insert into GURFEED (GURFEED_SYSTEM_ID,GURFEED_SYSTEM_TIME_STAMP,GUR tgrfeed terminated with error.<br><br>The error can occur when the value for parameter 03 (Records per feed document) is low, and a large number of transactions are being fed.  A workaround for this error consists of the following steps:<br>1. Sweep out the gurfeed table, saving the data<br>2. Remove the '-1' gjbprun_one_up_no, like you would do anytime tgrfeed aborts<br>3. Reset tgrfeed parm03 to a higher number or allow it to default (value is 9900)<br>4. Resubmit tgrfeed | 6.0 | In Q/A for 6.2.0.1.  Resolved for 7.2  Listed on UDC as resolved for 6.2.0.1 |

| TSRCBIL | 89417 | Level 2<br><br>-Medium | TSRCBIL will not create a schedule/bill for a student when printing in Zip/Postal Code, Name order if the student does not an address on SPAIDEN with the requested address type.<br><br>TSRCBIL should print the schedule/bill with a ***WARNING*** No Address message. | 5.4 | Open Defect |

## *Known Issues in General (as of October 31, 2005)*

| Form or Process | Current Defect or Contact Number | Priority Level | Defect Title and Workaround | Version Defect Noted | Status at SHES according to ActionWeb |
|---|---|---|---|---|---|
| GLBDATA | 89576 | Level 3 defect – Low | Possible problem with GLBDATA of adding duplicate IDs to POP SEL on GLAEXTR defect 89576 | 5.5.3 | Open Defect |
| GOASEVS | 89829 | Level 2 defect – Medium | Problem with SEVIS GOASEVS OPT Employment Start and End Dates defect 89829 | 5.5.3 | Resolved for 6.2.3 and 7.0.1 |
| GUAQFLW | 66775 | Level 2 defect - Medium | Possible memory management problem in Banner 5.x with QuickFlow (GUAQFLW) defect 66775<br><br>Workaround:  Use smaller QuickFlows. | 5.1 | Open Defect |
| GUTGMNU | 94660 | Level 3 defect – Low | Problem with Gen62 Release Guide related to GUTPMNU doc defect 94660 | 6.2 | Resolved for 7.0 |
| ORACLE REPORTS | 90296 | Level 2 defect – Medium | Problem with documentation related to Oracle Reports defect 90296 | 5.6 | Resolved for 7.0 |

## *Known Issues in Student (as of October 31, 2005)*

**Note**: For specific information regarding Fee Assessment, refer to SHES FAQs for Fee Assessment Enhancements documentation for 6.x. This document was also provided as part of the 6x upgrade.

| Form or Process | Current Defect or Contact Numbers | Priority Level | Defect Title and Workaround | Version Defect Noted | Status at SHES according to ActionWeb |
|---|---|---|---|---|---|
| SAAADMS/ SPAIDEN | 88265 | Level 2 Defect – Medium | When Oracle Patchset 13 is applied, the cursor behaves differently when inserting and copying records on SAAADMS. Before the patchset application , when inserting and copying record the cursor would appear in the 'TERM' field, highlighting the whole | 5.6 | Open Defect |
| SAADCBT | 87837 | Level 2 Defect – Medium | There is a problem with the SCROLLING function in the Application Information block which can display incorrect data in the Batch Entry block. | 5.6 | Resolved for 7.1 |
| SAAQUIK | 90179 | Level 2 Defect – Medium | The Create/Update Academic History Degree Record checkbox on the General Student record is not being selected when using SAAQUIK to admit students and Error Severity is set to No Checking for General Student on SOACTRL. | 5.6 | Resolved Contact made with UDC (SR # 1-6803651). |
| SAAQUIK | 94828 | Level 2 Defect – Medium | On SAAQUIK (6.1) and SRAQUIK (6.1), direct entry of zip code brings in the first record from GTVZIPC when multiple records exist, but no message re additional records is given. On SPAIDEN, same process returns a warning message. | 6.1 | Resolved for 6.3 and 7.0 |
| SAPAMAL | 89301 | Level 2 Defect – Medium | SAPAMAL does not write all the necessary records to the collector table used by the Communication Plan. SAPAMAL only writes a record to the collector table (sorccol) with an action indicator of 1. When sorcpln is run, no letters are generated. | 5.6 | Duplicate of defect 103521 which has been fixed for 6.3.0.1 and 7.1.0.1 |

| Form or Process | Current Defect or Contact Numbers | Priority Level | Defect Title and Workaround | Version Defect Noted | Status at SHES according to ActionWeb |
|---|---|---|---|---|---|
| SCRBULT | 88255 | Level 2 Defect – Medium | If a course has its status changed for "Active" to "Inactive," it continues to appear on the report in subsequent academic years. | 5.6 | Open Defect |
| SGPHOLD | 104348 | Level 3 Defect – Medium | If a student has more than one active hold of the same type, SGPHOLD will fail if it tried to delete or release holds. | 7.0 | Resolved for 7.2 |
| SFAREGF | 90228 | Level 2 Defect – Medium | There is a problem passing the correct ID when SFAFAUD is called from the Options Menu of SFAREGF.<br><br>**Note**: The Student 6.2.1 Release Guide incorrectly lists defect 90228 as Resolved. | 5.6 | Resolved for 6.3 |
| SFAREGS | 89784 | Level 2 Defect – Medium | The Course line message area displays a blank message when attempting to re-register into a course, which became cancelled. | 5.6 | Open Defect |
| SFAREGS | 89903 | Level 2 Defect – Medium | When there is a mix of srce codes on TSAAREV for a detail code used in fee assessment, and there has been an ESTS withdrawal, and there are no SFRFAUD records, fee assmt performed from SFAREGS does not correctly skip the trans that are not srce code R. | 5.6 | Open Defect |
| SFAREGS | 93166 | Level 2 Defect – Medium | When using the 'Delete all CRNs' functionality, it is possible to not have fee assessed on-line from SFAREGS.<br><br>**Note**: This defect was incorrectly listed as being corrected in the SHES Student 6.2.1 release guide. Please see defect number 101301 created as a result. | 6.1 | Posted for Release 6.2.0.1 |

| Form or Process | Current Defect or Contact Numbers | Priority Level | Defect Title and Workaround | Version Defect Noted | Status at SHES according to ActionWeb |
|---|---|---|---|---|---|
| SFAREGS | 101301 | Level 2 Defect – Medium | Defect #93166 is not completely resolved. When using the 'Delete all CRNs' functionality, it is still possible to not have fee assessed on-line from SFAREGS.<br><br>**Note**: Patch 96995 (released by OIIT on March 31, 2005 in conjunction with the Student 6.2.1 upgrade) contains the defect correction for this issue. | 6.2 | Posted for Release 6.2.1.1 |
| SFARQST | 89112 | Level 2 Defect – Medium | Entering zip+4 code on SFARQST does not automatically populate St, city, and nation fields as it does on SPAIDEN. Re-occurrence of defect 44651. | 5.6 | Resolved for 7.2 |
| SFARQST | 87657 | Level 3 Defect – Low | The Zip Code field gives an error of "[zip code] is invalid; LIST for valid choices" when the free-format address zip code is entered and it is not found on GTVZIPC. The error does not prohibit the successful SAVE of the data. | 5.6 | Resolved for 7.2 |
| SFASLST | 89758 | Level 2 Defect – Medium | Our recorders can no longer roll a grade on the form SFASLST. It tells them that their access does not allow it. They have maintenance access to this form. When they click the checkbox it says in the autohint line: "*ERROR* Your security access prohib | 5.6 | Resolved for 6.4 and 7.2 |
| SFKFEE1 | 89135 | Level 2 Defect – Medium | Refund by Total - If a Student drops and adds equal amounts of Billing Hours on different days during the same Refund by Total Refund Period, the process currently does not reverse the penalty as it did prior to 5.6. | 5.6 | Posted for 6.3.0.1 and 7.1.0.1 |
| SFKFEE1 | 89864 | Level 2 Defect – Medium | Additional fee from SFAAFEE/SFAEFEE is not being assessed when total withdrawal is done. | 5.6 | Open Defect |
| SFKFEE1 | 90366 | Level 2 Defect – Medium | Refund by Total. Course Campus SFARGFE rules. When a student drops a course which was assessed from a Course Campus Rule, and the drop occurs outside of the Refund by Total Refund Period: | 5.6 | Resolved for 6.0.0.4 |

| Form or Process | Current Defect or Contact Numbers | Priority Level | Defect Title and Workaround | Version Defect Noted | Status at SHES according to ActionWeb |
|---|---|---|---|---|---|
| SFKFEE1 | 96413 | Level 2 Defect – Medium | The Minimum Amount on SFAFMAX is not enforced during a 100% Refund by Course Refund Period. For any other Percentage refund, the Minimum Amount is enforced.<br><br>**Note**: This defect was incorrectly listed as being corrected in the SHES Student 6.2.1 release guide. Please see defect number 102443 created as a result. | 6.1 | Posted for Release 6.2.0.3 and 7.0.0.1 |
| SFKFEES | 102443 | Level 2 Defect – Medium | Defect 96413 was not corrected with the 6.2.0.3 version of the Code. The defect still exists: The Minimum Amount on SFAFMAX is not enforced during a 100% Refund by Course Refund Period. For any other Percentage refund, the Minimum Amount is enforced. | 6.2.1 | Posted for 6.3.0.1 and 7.1.0.1 |
| SFRCTRL | 87964 | Level 2 Defect – Medium | The SFRCTRL database table [SFARGTC - Third Party Registration Time Controls Form] needs an Activity Date column added to show when the rules were first inserted or were last updated. | 5.6 | Open Defect |
| SFRWDRL | 71761 | Level 2 defect - Medium | Problems with addresses on SFRWDRL report. If use GTVSDAX Internal Codes for parameters 10 and 11, and if the student's address contains a county code, the home and campus addresses print, but then the process terminates with error: ORA-01480: trai | 5.2 | Open Defect |
| SGAADVR | 89507 | Level 2 Defect – Medium | After entering the ID and term in SGAADVR then doing next block, if the key block term matches the Advisor Information From Term, there will be two 'Detailed Student Information' links under Options. | 5.6 | Resolved for 6.3 and 7.1 |
| SGASTDN | 74960 | Level 2 Defect - Medium | In the Additional Student Information window if you query for a Block code and select it, you aren't returned to Additional Student Information. Instead the Academic Status window comes up. | 5.3 | Resolved for 7.0 |
| SGASTDN | 89055 | Level 2 Defect – Medium | "ERROR-Both progress evaluation standing and term must be filled in or both must be blank..." is received when trying to update SGASTDN after it has been duplicated using SFAREGS. | 5.6 | Posted for 6.2.1.1Resolved for 7.0 |

| Form or Process | Current Defect or Contact Numbers | Priority Level | Defect Title and Workaround | Version Defect Noted | Status at SHES according to ActionWeb |
|---|---|---|---|---|---|
| SGASTDN | 88399 | Level 3 Defect – Low | When you access GUASYST from SGASTDN, the ID that appears in GUASYST is the previous one used by that form, not the one from SGASTDN. This occurs regardless of how GUASYST is accessed. If you access GUASYST from SPAIDEN, the ID from SPAIDEN is used. | 5.6 | Resolved for 7.0 |
| SHACOMI | 89438 | Level 2 Defect – Medium | On the third block, it seems the query function does not work. Here's an example. I have 100 members in a committee. When I go to the third block, it will bring up the list of the 100 members one at a time. | 5.6 | Open Defect |
| SHADEGR | 89717 | Level 2 Defect – Medium | There is a problem performing a RECORD/REMOVE on SHADEGR. | 5.6 | Resolved for 7.0 |
| SHAINST | 98161 | Level 2 Defect – Medium | A request for a Duplicate Grade Mailer, requested in error, cannot be deleted from SHAGCOL when the User cancels the request by "unchecking" the Duplicate Grade Mailer Request field on SHAINST. | 5.6 | Open Defect |
| SHATAEQ | 89516 | Level 1 Defect – High | SHATAEQ v 5.6.0.1, if multiple levels exist for the same institution, when rolling the data back to Academic History, one of the term GPA records is not rolled. This is incorrect; both SHRTGPA records are to be created. | 5.6 | Resolved (Issue could not be replicated in 6.2.0.1 or 7.0.) |
| SHATEAQ | 98073 | Level 2 Defect - - Medium | SHRTAEQ v 6.2.0.1 is printing one page per course when multiple transfer institutions are present with multiple attendance periods.<br><br>Since upgrading to 6.2.0.1 of SHRTAEQ, the report is not printing properly for students with more than one transfer school.  The first school prints properly, but the second school prints only one or two courses per page, with the transfer and institution GPA information at the bottom of each page. | 6.2.0.1 | In Progress for 6.4.0.1 and 7.3. |

| Form or Process | Current Defect or Contact Numbers | Priority Level | Defect Title and Workaround | Version Defect Noted | Status at SHES according to ActionWeb |
|---|---|---|---|---|---|
| SHATAEQ | 95536 | Level 2 Defect - - Medium | Using the 'A - Articulate' Articulation Switch causes the Transfer Attendance Period to be set = NULL. The form then issues: FRM-40736: PRE-INSERT trigger raised unhandled exception ORA-01400. This occurs when the SHATRNS record is created manually. | 6.1 | Resolved for 6.3.0.1 and 7.1.0.1 |
| SHATAEQ | 75751 | Level 2 Defect – Medium | Issue 1 of 3 After articulating a One-to-Many using the Articulation Switch = A, performing a PREVIOUS RECORD will cause the last Institutional Equivalent to disappear. This is a problem with the 5.3.2.1 version only. The 4.4.3.1 version functions correctly. Workaround: After articulating with the "A" - SAVE that transaction.

Issue 2 of 3 Articulate a One-to-Many. PREVIOUS RECORD to the "One" Transfer Course and perform a RECORD/REMOVE. SAVE. The original Transfer Course with its matching Institutional Equivalent is removed, leaving an Institutional Equivalent(s) with no matching Transfer Course. This is also a problem with the 4.4.3.1 version. In previous versions, performing a RECORD/REMOVE would only delete the Institutional Equivalent, leaving the original Transfer Course. Workaround: Perform a ROLLBACK and NEXT BLOCK, and the original Transfer Course does actually remain.

Issue 3 of 3 After entering the Transfer Courses, if the User then performs a PREVIOUS RECORD, the Auto Hint area will display a "debug" statement: "resetting art_ind in key_prevrec." When the user is on the first line of Transfer Courses, that message then becomes a pop-up window that must be acknowledged. This is only a problem with the 5.3.2.1 version. The 4.4.3.1 version does display this message. | 5.3.2 | Open Defect |
| SHATAEQ | 89680 | Level 2 Defect – Medium | There is a problem with the display of the 'Many' Courses when a One-to-Many is articulated, Rolled and Deleted from history. This appears to occur when a 'One-to-Many' is the first record on SHATAEQ. | 5.6 | Open Defect |

| Form or Process | Current Defect or Contact Numbers | Priority Level | Defect Title and Workaround | Version Defect Noted | Status at SHES according to ActionWeb |
|---|---|---|---|---|---|
| SHATAEQ | 86326 | Level 2 Defect – Medium | When a Group Code is used on SHATATR, the courses linked to that Group are considered as an 'AND' - all the Courses in the Group must be taken or entered on SHATAEQ in order for an articulation to take place. However, a student could receive grades below the Minimum Grade defined on SHATATR for all but the Primary Course of the Group and SHATAEQ will still articulate successfully. The student should "pass" all the courses in the Group before receiving articulation "credit." | 5.5 | Open Defect |
| SHATATR | 89379 | Level 2 Defect – Medium | When using the RECORD/DUPLICATE function on SHATATR, the form copies the Equivalent Indicator [set = Y] and does not allow a User to update it to a NULL or 'N.' This can cause a Transfer Course to not have an Equivalent... | 5.6 | Resolved for 6.3 and 7.1 |
| SHATATR | 66271 | Level 3 Defect - Low | I ran into an error in the SHATATR block (Institution Course Attributes) of the form. Error message: *ERROR* Changes must be COMMITTED before going to the next block. I did not make any changes to this course on any of the blocks: I was just trying to next block through the information. This ONLY happens if the course does not have attributes. Workaround: Use the PREV BLOCK function to return SHATATR main window, and use Option: "Institution Course Comments" to view or enter comments. Same problem with the 5.x version of the form. | 5.2 | Resolved in 6.3 and 7.1 |
| SHATCKP –INB | 87226 | Level 2 Defect – Medium | There is no apparent space between the Course Number field and the Course Title. This causes the cursor to "disappear" as if the Course Title cannot be entered. | 5.6 | Resolved (Could not be replicated in 6.x.) |
| SHATPRT | 94587 | Level 2 Defect - Medium | Receive a fatal ORACLE error in SHATPRT when trying to save a new transcript type: ORA-01400: cannot insert NULL into ("SATURN"."SHRTPRT"."SHRTPRT_TPRT_CODE"). As a workaround, Perform an Insert Record. Perform a | 6.1 | Open Defect |

| Form or Process | Current Defect or Contact Numbers | Priority Level | Defect Title and Workaround | Version Defect Noted | Status at SHES according to ActionWeb |
|---|---|---|---|---|---|
| | | | Record/Duplicate. Change the Transcript Type code to the new code. Save. | | |
| SHFGRDE | 90337 | Level 3 Defect – Low | The function f_get_shrgrde_rowid does not join limit the set used to return results to those rows in shrgrde with the same level as the course that is sought. This affects SEM output. | 5.6 | Open Defect |
| SHRROLL | 87599 | Level 2 Defect – Medium | RUN SEQUENCE NUMBER: WRN-LONGTOK: Token "YY" exceeds containing column width (1) shrroll completed with warning(s) ...is received if the Campus Code on SSASECT contains more than one character. | 5.6 | Open Defect |
| SIAINST | 67038 | Level 3 Defect - Low | In the SHES Banner Student Release 5.2 Release Guide (page 236), a menu change is listed for *FACULTY. The description for SIAINST does reflect correction "Faculty/Advisor Information Form. However, when entering the form, the title bar is not uniform. It reads "Faculty Information Form" - should read "Faculty/Advisor Information Form." Should also be corrected for 4.x | 5.2 | Resolved for 7.0 |
| SLARMAP | 87725 | Level 3 Defect – Low | If an inactive room is entered in the Preferences block, it can be saved without any error message or warning being returned. Since the request for an inactive room can affect the SLRSCHD (Batch Scheduler) results, a warning (at least) should be given. | 5.6 | Open Defect |
| SLRDADD | 65699 | Level 2 Defect – Medium | The process should update the User and Source fields. These fields are not consistently populated when SLRADDR is run. SPRADD_USER appears never to be updated. SPRADDR_ASRC_CODE is only blank for addresses updated with this process. The fact that these two fields are not updated makes tracking data entry errors impossible.<br><br>SPRADDR_USER                VARCHAR2(30)<br><br>SPRADDR_ASRC_CODE           VARCHAR2(4) | 4.3.3 | Resolved for Release 7.1 |

|---|---|---|---|---|---|
| SMAGROP | 97563 | Level 2 Defect – Medium | Defect 64943 was only corrected with the 5.6.0.1 version of SMAAREA. Multiple rules with the same name are still allowed on 5.x SMAGROP and on both 6.x SMAAREA and SMAGROP.<br>If two rules of the same name are entered into SMAAREA 5.6.0.1, the User receives: ORA-00001: unique constraint (SATURN.SMRAGAM_KEY_INDEX) violated<br>However, the 6.x version of SMAAREA and both the 5.x and 6.x versions of SMAGROP still contain the defect. Multiple rules of the same name are allowed to be successfully saved. Generally, the data from the first rule then defaults into the second rule. | 6.2 | Resolved for 7.2 |
| SMAPROG | 87111 | Level 2 Defect – Medium | SMAPROG will not allow entry of just a max number of courses in the Program Restricted Grades block | 5.6 | Could not replicate on the 7.2 version |
| SMASARA | 80815 | Level 2 Defect – Medium | If you go to SMASARA, copy the defaults from a current area that has re-use set to NONE for both course and attribute, change the re-use options to BOTH for course/attribute, and run a compliance, the SOURCE indicates ADJUSTED, but the reuse flags still indicate NONE. Note that this only occurs if the area is attached to a captive program not if the area is dynamically attached. | 5.4.0.1 | Not a Defect |
| SMIAOUT | 88110 | Level 2 Defect – Medium | Within the Course/Attributes Attachment Results Block of SMIAOUT, the Detail Text option is disabled if the detail line being reviewed is a rule. The option is disabled if the text is original from SMAAREA or adjusted from SMASARA. | 5.6 | Open Defect |
| SMRCMPL | 89367 | Level 1 Defect – High | With multiple entity reuse, if a course is split in an area, it may incorrectly be used more than once in a subsequent area even though Reuse Within that area is not permitted. | 5.6 | Open Defect |
| SMRCMPL | 88038 | Level 2 Defect | Two issues regarding use of an in-progress course when the course | 5.6 | Open Defect |

| SSAEVAL | 87887 | Level 2 Defect – Medium | More than one User should be allowed to update different CRN Schedule Evaluation data for the same term. | 5.6 | Open Defect |
| SSAMATX | 88759 | Level 3 Defect – Low | "FRM-40602 Cannot insert into or update data in a view. User" is received when after an initial query and a ROLLBACK is performed. On other similar forms, such as SSASECM and SLARUSE, the ROLLBACK puts the form back into an "Enter Query" mode. | 5.6 | Resolved for 7.0 |
| SSASECT | 89066 | Level 2 Defect – Medium | Meeting Days/Times should not be allowed to be modified if enrollments exist for the CRN. | 5.6 | Open Defect |
| STVCOLL | 88539 | Level 2 Defect – Medium | When a LIST or Search is performed from a College Code parameter, the following error must be acknowledged three times before STVCOLL is brought to the screen: "FRM-40105: Unable to resolve reference to item" | 5.6 | Duplicate of Defect 89162  Resolved for 7.0 |
| SSRROLL | 103806 104374  104426 | Level 1 Defect  - High | SSRROLL process aborts with error: ORA-20100: ::Room has inactive status; cannot be scheduled:: ORA-06512: at "BANINST1.GB_CLASSTIMES_RULES", line 1482 ORA-06512: at "BANINST1.GB_CLASSTIMES", line 730 ORA-06512: at line 1 | Student 7.1.0.1 | Resolved with 7.1.1.1 |

## Known Issues in Banner Self-Service Products (as of October 31, 2005)

| Form or Process | Current Defect or Contact Number | Priority Level | Defect Title and Workaround | Version Defect Noted | Status |
|---|---|---|---|---|---|
| BWCKCAPP/ BWLKOSTM | 90071 | Level 2 Defect – Medium | The Select Term page for WebCAPP and Transcripts depends on Faculty registration controls on SOATERM. | Self-Service Faculty and Advisors 5.4 | Open Defect |
| BWCKCPMT | 90332 | Level 2 Defect – Medium | The problem is that we have experienced several "Insert" errors that were caused by a blank "cc_clerk" parameter. The student's credit card is charged but since the attempt to update Banner fails, the student's record does not reflect the payment. | Self-Service Student 5.6 | Resolved for 7.2 |
| BWCKFRMT | 97538 | Level 3 Defect – Low | Office hours(bwskoffh.p_display_office_hours) page-Office hours displays as 'Your Office Hours' whether seen by faculty or students. This text is hardcoded in bwckfrm1.sql.<br><br>Workaround:  Update hardcoded text in bwckfrm1.sql to 'Office Hours', recompile as BANINST1 | Self-Service Student 6.2 | resolved for 6.3 and 7.1 |
| BWLKFMGD/ BWLKFFGD | 90309 | Level 2 Defect - Medium | Encounter an error when pressing the Record Set links on the Midterm and Final Grade web pages, if the user is not the primary instructor. Occurs when patch 84982 has been applied. | Self-Service Faculty and Advisors 5.4 | Resolved 7.2 |

| Form or Process | Current Defect or Contact Number | Priority Level | Defect Title and Workaround | Version Defect Noted | Status |
|---|---|---|---|---|---|
| BWLKFFGD | 91719 | Level 2 Defect - Medium | Incorrect grades processing when a CRN has more than one page of students.<br><br>For the final grades (bwlkffgd.P_FacFinGrd), existing grades can incorrectly be updated to NULL for a CRN that has more than one page of students when a faculty member with display only access views grades for the CRN and navigates to the next page.<br><br>For the midterm grades (bwlkfmgd.P_FacMidGrd), non-primary faculty with display only access receive an Oracle error when trying to navigate to the second page of grades:<br><br>ORA-06550: line 7, column 2:<br>PLS-00306: wrong number or types of arguments in call to 'P_FACMIDGRDPOST'<br>ORA-06550: line 7, column 2:<br>PL/SQL: Statement ignored<br><br>The electronic gradebook is not effected.<br><br>The suggested work around is to increase the setting for GRDISPNUMB on GTVSDAX such that all students display on one web page. | 6.0 | Resolved for 6.4 |
| BWLKOIDS | 89501 | Level 3 Defect – Low | We are able to access data for a Student who has an Inactive status on SGASTDN, by entering the ID directly on the ID Selection page. | Self-Service Faculty and Advisors 5.4 | Open Defect |
| BWLKOIDS | 89607 | Level 3 Defect – Low | Issue is with the drop down list on the ID Selection page. If you input an Inactive user's name directly on the ID Selection web page the following message is returned: There are no students registered in your assigned courses or assigned as your advise | Self-Service Faculty and Advisors 5.4 | Resolved for 7.2 |

| Form or Process | Current Defect or Contact Number | Priority Level | Defect Title and Workaround | Version Defect Noted | Status |
|---|---|---|---|---|---|
| HWSKFCAP | 81075 | Level 2 Defect – Medium | If an advisor goes in and runs Degree Evaluation for one of his advisees and then goes to StuWeb and then runs Degree Evaluation on himself, the Degree Evaluation still looks at the last advisee the advisor ran the Degree Evaluation on and not himself. | Faculty & Advisor Self-Service 5.2.1 | Open Defect |
| ROLE BASED SECURITY | 76127 | Level 1 Defect – High | When Primary Instructor checking is turned off, an unassigned advisor with a role (such as teaching assistant) defined on SOAROLE, should have update access to Midterm/Final Grades and Component/Subcomponent marks via Electronic Gradebook by Student and E | Self-Service Faculty and Advisors 5.4 | Open Defect |

### Known Issues in Banner Financial Aid (as of October 31, 2005)

| Form or Process | Current Defect or Contact Number | Priority Level | Defect Title and Workaround | Version Defect Noted | Status |
|---|---|---|---|---|---|
| RPAELAP/ RPRLOPT | 101826 | Level 3 Defect – Medium | When a Revised Gross Amount is entered on RPAELAP and on RPRLOPT the Memo Actual Amount is checked, the amounts incorrectly memo in rounded dollars, not in cents. | Financial Aid 6.5.1 | Open Defect |
| Direct Loan Disbursement | 84475 | Level 4 Defect - Low | Once a check amount has been entered, Loans authorize instead of memo even if additional disbursement edits will prevent the loan from paying at the time of disbursement. | Financial Aid 5.6 | Open Defect |

# Testing and Certification

**Objective**

The objective of testing and certifying new releases is to assure the quality of the application.

Testing was performed for normal activities and did not cover all instances of idiosyncratic data or all local business practices.

**Test Plans**

Test plans are provided for your convenience. They are the plans used by OIIT and provided to the Beta sites at the beginning of the testing process. They are not intended as final documentation about the application.

**Certification**

OIIT and institutional Beta sites have tested and certified this release at the baseline prerequisites for Oracle 9i Release 2 (Version 9.2.0.6.0).

# Release Location

**Release and Documentation**

This release and the accompanying documentation are available on ftp.usg.edu in the following directory:

banner/prod/gamod7/70

Documentation for this release includes the following:

- Release Notes for Georgia Enhancements 7.0

- Georgia Enhancements 7.1Test Plan

- User Documentation

Documentation will also be placed on the EAS Web site at the following URL:

https://www.usg.edu/banner/7x/gamods.phtml

## Additional Resources

**GABEST**

To discuss issues about Banner and Georgia Enhancements with other users, subscribe to the GABEST listserv.  OIIT posts release notices, upgrade announcements, information about training opportunities, occasional surveys, and other information related to Banner and the Georgia Enhancements.

To subscribe to the GABEST-L list, send an e-mail message to the following address:

listserv@listserv.uga.edu

You do not need to include a subject line in the e-mail message.  In the text area of the message include only the following:

subscribe GABEST-L <full name>

For example: subscribe GABEST-L John Doe

**OR**

Go the following Web site: http://listserv.uga.edu/.

Select "Browse, Subscribe, Post, Search ..."

In the List Name box, type *GABEST-L* and follow the resulting instructions.

**EAS Web Site**

EAS disseminates and archives critical information and documentation about Banner and the Georgia Enhancements through its Web site at the following URL:

https://www.usg.edu/banner/

**Banner V7 Web Site**

We have established a page on the Banner Production Support Web site that includes easy access to information related to the upgrade to Banner 7.x and the Georgia Enhancements 7.0 at the following URL:

https://www.usg.edu/banner/7x

# Support

**OIIT Customer Services**

For additional OIIT resources and support, contact the OIIT Helpdesk:

Web              http://www.usg.edu/customer_services
(self-service ticket submission)

E-mail         Helpdesk@usg.edu

For urgent or production down situations, call the OIIT Helpdesk:
