Financial Aid Reporting System

Student Data Element Dictionary

University System of Georgia

Introduction to the Financial Aid Reporting System

Over the past three years, the System Office has been working in conjunction with institutional financial aid directors on a new data collection effort to track student financial aid information. Previous data collection efforts were survey-based and concentrated on aggregated institution-level data. However, current System needs require a more granular approach—one that permits analysis of student-level data. With this new database, the System Office will be able to answer financial aid policy questions with much greater accuracy. Research questions include the effects of need and non-need based financial aid on student retention and graduation and the performance of students receiving various forms of HOPE scholarships. Financial aid data will be collected annually on an award year basis beginning in Fall 2001.

Each data element in this dictionary contains the following fields:

Element Title and Definition: Describing the data to be collected.

Codes and Categories: Describing the element size and valid codes and formats for the data.

Banner Reference: A description of the Banner forms and tables from which the data are drawn. Institutions not using Banner will be given a database layout file to submit their data.

Comments/Examples: Where relevant, an explanation of what is to be included in the data elements.

Record Type: The financial aid database will be an annual extraction of financial aid award year data. However, in order to facilitate comparability with the Student Inventory Reporting System (SIRS), some data will be collected for each term that the student is enrolled in the award year. Data defined as 'Year' record types are collected once for each student. Data defined as 'Term' record types are collected for each academic term the student is enrolled for that award year.

ELEMENT TITLE: Current Student Identification Number

DEFINITION: A number which uniquely identifies a student

CODES AND CATEGORIES:

1. **Element Size:** 9

2. **Valid Codes**: any 9-digit combination of numbers and characters

BANNER REFERENCE: Students selected for SIRS reporting must have a General Student record that is effective for the term of reporting and identified in the system using the Identification Form (SPAIDEN). SPRIDEN_ID in table SPRIDEN.

COMMENTS/EXAMPLES:
In most cases, this is the student's social security number. This is S101 in SIRS.

ELEMENT TITLE: Academic Term

DEFINITION: The Academic Term from which the data are being reported

CODES AND CATEGORIES:
1. **Element Size:** 5
2. **Valid Codes:** (YYYYT)

The general format for this data element will be the 4-digit fiscal year plus the 1-digit semester code as defined below.

Semester Codes
1 = Summer Term   Example: Spring 1999=19994
2 = Fall Semester   Summer 2000=20011
4 = Spring Semester

BANNER REFERENCE: Term code must be entered on ROAINST (3rd page). Term is selected by matching the field RORCRHR_TERM_CODE (ROAINST) using the table ZORTRMT (Form ZOATRMT).

COMMENTS/EXAMPLES: The academic term identifies with which term financial aid activity is associated with a student. The coding format must remain consistent with SIRS codes for academic term, as this element will be used in merging financial aid data with SIRS data for analysis purposes.
